Notice of Completion and Availability of the Final Environmental Impact Report (FEIR) for a Replacement Airline Passenger Terminal at Burbank Bob Hope Airport

The proposed project would replace the existing 14-gate, 232,000-square-foot passenger terminal with a 14-gate passenger terminal that meets current California seismic design and FAA airport design standards. The replacement passenger terminal would be developed in accordance with modern design standards to provide enhanced passenger amenities; security screening facilities that meet the latest TSA requirements; and other airport facilities (including hold rooms, baggage claim areas, and public areas) that are designed and sized for the kinds of aircraft the airlines routinely operate. The FEIR includes detailed analysis of three potential replacement terminal options:

1. Adjacent Property Full-Size Terminal Option – A 355,000-square-foot replacement passenger terminal to be constructed on the B-6 Adjacent Property. This is the Authority's preferred development option.
2. Southwest Quadrant Full-Size Terminal Option – A 355,000-square-foot replacement passenger terminal to be constructed in the southwest quadrant.
3. Southwest Quadrant Same-Size Terminal Option – A 232,000-square-foot replacement passenger terminal to be constructed in the southwest quadrant.

Anticipated Environmental Effects of the Project:

1. It is anticipated that the Adjacent Property Full-Size Terminal Option would result in significant air quality impacts.

2. It is anticipated that the Southwest Quadrant Full-Size Terminal Option would result in significant air quality impacts.

3. It is anticipated that the Southwest Quadrant Same-Size Terminal Option would result in significant air quality impacts.

The FEIR is available electronically at: www.BURreplacementterminal.com. For your convenience, we have provided you a copy of the FEIR on the enclosed CD.

The Authority is considering certification of the EIR at the July 11, 2016, Burbank-Glendale-Pasadena Airport Authority Commission Meeting.
