Environmental Protection Agency
South Coast Air Quality Management District (SCAQMD)*
Regional Water Quality Control Board (RWQCB)*

II. PROCEDURES

It was reiterated that the intent of the MACC is to facilitate communication and the sharing of information between regulatory agencies. The referral of plans, etc., from one agency to another will be accomplished through established protocols.

III. CSD IMPLEMENTATION UPDATE

DRP	Issues have come up regarding protocols for making information available to the public prior to approval. Agencies will provide contact information for their respective custodians of public records.
DPW	DPW is in receipt of the Accumulated Ground Movement Implementation Plan. Additional stations need to be added around the periphery of the project area to get better coverage. Information will need to be more specific for the survey division. DPW is working with the operator to address these issues.
DPH	DPH is coordinating with DRP and will retain an independent, qualified engineer to monitor noise and vibration.
LACoFD	Regarding the re-vegetation provision included as a requirement in the next update of the Emergency Response Plan (ERP), that provision would be reviewed by DRP's staff biologist in consultation with LACoFD. LACoFD clarified that it would not be responsible for overseeing revegetation pursuant to the approved Emergency Response Plan - DRP would be the responsible agency for overseeing implementation of that component.
DOGGR	Nothing to report at this time
