Malibu Coastline
(Portions of the) Palos Verdes Peninsula and Coastline
Point Dume
(Portions of the) Santa Monica Mountains
Santa Catalina Island
Terminal Island (Pier 400)

* REGULATORY INFORMATION:

The County considers the biological resources in the Santa Catalina Island and Santa Monica Mountains Coastal Zones to be of significance. The management and review of biological resources in the Coastal Zones differs from the countywide Significant Ecological Area regulatory program. Biological resource management and regulation in the Santa Catalina Island Coastal Zone is implemented through the Santa Catalina Island Local Coastal Program. Biological resource management in the Santa Monica Mountains Coastal Zone is currently implemented through the Malibu Land Use Plan (when certified, resource protection in this area will be implemented through the Santa Monica Mountains Local Coastal Program).

** SEAs WITHIN CITIES:

Emphasis is given for the Significant Ecological Areas in the unincorporated areas. Therefore, any SEA within an incorporated city will have a more muted green color.

NOTES:

This map is a component of the Los Angeles County General Plan Update Program. It is a working draft subject to revision. This map will not be official until adopted by the Board of Supervisors. Information within cities is for reference only. Suggestions for modifications to its contents will be considered by County staff when revising the map for public hearings by the Regional Planning Commission. Written comments and supporting documentation should be submitted to the Department of Regional Planning General Plan Development Section (address: 320 W. Temple Street, Los Angeles, CA 90012; fax: 213-626-0434; or email: generalplan@planning.lacounty.gov).
