DEPARTMENT OF REGIONAL PLANNING**GENERAL INFORMATIONI.A. Map Date: 7/10/08 Staff Member: Nooshin Paidar/Carolina BlenginiThomas Guide: 679-E5 USGS Quad: Yorba LindaLocation: Corner of Brea Canyon Cutoff Road and Balan Road, Rowland Heights, CaliforniaDescription of Project:

This project is a request for a Conditional Use Permit to authorize construction of three buildings plus landscaped area in the R-1-12,000-DP zone, as part of the Agape International Christian Center (AICC) complex. The proposed development consists of a one-story chapel building (6,902 square feet), a two-story class room building (8,802 square feet), and a two-story parking structure (31,196 square feet). The chapel building includes spaces such as administration office, lobby, chapel with 250 seats, bride room, cry room, restrooms, storage room, and a mezzanine floor that serves as mechanical room and storage. The two-story class room building includes 12 class rooms (including one for toddlers), lobby, storage room, restrooms on both floors, elevator, administration office, electric and equipment room, A/C room, and kitchen. It also comprises a living quarter for occasional visitors with three bedrooms, three individual bathrooms, and a kitchenette. The two-story parking building holds 96 parking spaces from which four are handicapped spaces. The proposed two-way vehicular entrance to the project is located at the northwest of the property facing Brea Canyon Cut-off Road and runs parallel to the western property boundary. There are two pedestrian entrances to the proposed facilities facing Balan Road providing direct access to the two main buildings. Major events held at AICC will include service on Saturdays and Sundays with an estimated attendance of 250 people. Classes, meetings and seminars have an estimated attendance of 60 people on weekdays and 30 people during the weekend.

Gross Acres: 3.43 acres / 149,377 square feetEnvironmental Setting:

This site is characterized by sloping topography in a non urban area. The vacant property in the shape of a triangle is located at the intersection of Balan Road and Brea Canyon Cutoff Road, a 90 feet right-of-way major street. The vegetation consists of only brush, weed and a few small trees. The parcel is bounded by condominiums and a church to the north, multifamily to the east, and non-urban low-density residential neighborhoods to the south and west. The Rowland Heights Community Plan provides various design guidelines in non-urban neighborhoods and requires preservation of drainage courses in their natural state in these areas. The project is in compliance with goals and policies of Rowland Heights Community Standards District (CSD). Subject property is part of TR36375 and has lot coverage limitations.

DEVELOPMENT MONITORING SYSTEM (DMS)

As required by the Los Angeles County General Plan, DMS* shall be employed in the Initial Study phase of the environmental review procedure as prescribed by state law.

- Development Policy Map Designation: Nonurban Hillside (7)
- Yes No Is the project located in the Antelope Valley, East San Gabriel Valley, Malibu/Santa Monica Mountains or Santa Clarita Valley planning area?
- Yes No Is the project at urban density and located within, or proposes a plan amendment to, an urban expansion designation?

If both of the above questions are answered "yes", the project is subject to a County DMS analysis.

Check if DMS printout generated (attached)

Date of printout: _____

Check if DMS overview worksheet completed (attached)

EIRs and/or staff reports shall utilize the most current DMS information available.

Environmental Finding:

FINAL DETERMINATION: On the basis of this Initial Study, the Department of Regional Planning finds that this project qualifies for the following environmental document:

NEGATIVE DECLARATION, inasmuch as the proposed project will not have a significant effect on the environment.

-
An Initial Study was prepared on this project in compliance with the State CEQA Guidelines and the environmental reporting procedures of the County of Los Angeles. It was determined that this project will not exceed the established threshold criteria for any environmental/service factor and, as a result, will not have a significant effect on the physical environment.

MITIGATED NEGATIVE DECLARATION, in as much as the changes required for the project will reduce impacts to insignificant levels (see attached discussion and/or conditions).

An Initial Study was prepared on this project in compliance with the State CEQA Guidelines and the environmental reporting procedures of the County of Los Angeles. It was originally determined that the proposed project may exceed established threshold criteria. The applicant has agreed to modification of the project so that it can now be determined that the project will not have a significant effect on the physical environment. The modification to mitigate this impact(s) is identified on the Project Changes/Conditions Form included as part of this Initial Study.

ENVIRONMENTAL IMPACT REPORT*, inasmuch as there is substantial evidence that the project may have a significant impact due to factors listed above as “significant”.

At least one factor has been adequately analyzed in an earlier document pursuant to legal standards, and has been addressed by mitigation measures based on the earlier analysis as described on the attached sheets (see attached Form DRP/IA 101). The EIR is required to analyze only the factors not previously addressed.

MANDATORY FINDINGS OF SIGNIFICANCE

Based on this Initial Study, the following findings are made:

	Yes	No	Maybe	
a.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?
b.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does the project have possible environmental effects that are individually limited but cumulatively considerable? "Cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.
c.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Will the environmental effects of the project cause substantial adverse effects on human beings, either directly or indirectly? <i>Potential noise and traffic issues.</i>

CONCLUSION

Considering the above information, could the project have a significant impact (individually or cumulatively) on the environment?

Potentially significant Less than significant with project mitigation Less than significant/No impact
