RE: Purchase and Sale of Water Supply  
Project No. R2012-01589-(5)/CUP201200086

Dear Mr. Curzi,

It is our understanding that Canadian Solar would like to proceed with the development of a solar power project that would be located within your jurisdiction. [Project No. R2012-01589-(5)/CUP201200086 located on Assessor Parcel Nos. 3267-004-016 to 3267-004-018, 3267-004-025 to 3267-004-029, 3267-004-044 to 3267-004-046, and 3267-014-017 to 3267-014-020.], (herein "Project"). We understand that the water needs for this project are in the order of one hundred eleven acre feet (111 AF) of water: a need of approximately 53 AF during the first year plus approximately 58 AF over the anticipated life of the above referenced project

Cawelo has stored, and is able to sell and make available to Canadian Solar, via delivery into the California Aqueduct at or before reach 12E, up to two hundred fifty (250) AF of water. Sale and delivery of such water is contingent upon Cawelo and Canadian Solar entering into an acceptable purchase and sale agreement which would include pricing, delivery schedule, and other terms and conditions. Cawelo has already completed an unchallenged environmental analysis under the California Environmental Quality Act for its sale of the water, and delivery into the California Aqueduct.

It is also our understanding that the transfer of this water through the California Aqueduct is permitted under Article 55 of the State Water Project that permits the transfer of non-project water.

We would be happy to answer any questions you may have regarding the transfer of this water.

Sincerely,

Scott Hamilton,  
President, Cawelo Water District
