

*Project: AT&T new construction WTF  
Project Number: R2013-01799  
SEA Name: Santa Clara River  
SEATAC Meeting Date: November 4, 2013  
Planner: Iris Chi  
Biologist: Joseph Decruyenaere*

## **BCA/Biota Report Notes and Recommendations**

The planner and the biologist should use this section to explain why any items might be missing, why the BCA/Biota Report may be deemed complete despite these data gaps, and any recommendations or notes.

**Planner Notes and Recommendations:** This project is for the construction of a new wireless telecommunications facility within the Santa Clara River SEA. Staff is recommending SEATAC to declare that this project is consistent with the SEA Compatibility Criteria.

**Biologist Notes and Recommendations:** As this project meets all of the standard criteria that are used to determine when tower redesign is compatible with the SEA, Staff recommends that this new tower also be found compatible with the SEA Compatibility Criteria.
