

SUGGESTED MOTION FOR THE REGIONAL PLANNING COMMISSION ON
SHARED WATER WELLS

The recently adopted Shared Water Well Ordinance has established a good regulatory framework for the proposed limited sharing of a water well; however, it appears that certain property owners have established safe and viable shared well situations that do not fit the allowances in the Ordinance, and that predate both some applicable State laws and the County Ordinance. For this reason, some of these shared well situations should be reviewed for possible incorporation of related allowances into the Shared Water Well Ordinance.

I THEREFORE MOVE that the Commission direct staff to review some of these shared well situations, determine which of these situations deserve new allowances, and bring back appropriate related amendments to the Shared Water Well Ordinance for our consideration and recommendation to the Board of Supervisors.
