NOTES:

Proposed land use categories are not in effect until adoption by the Board of Supervisors. The specific use and intensity of development that may be permitted on any property will be determined by a review of this policy map (once adopted), other mapped and written policies of the General Plan, and the underlying zoning.

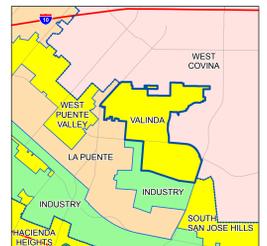

Hillside Management Area slope data was derived from a Digital Elevation Model (DEM) produced by Intermap, Inc. for the County of Los Angeles in 2001. The DEM was created using IFSAR technology with 5 meter posting.

Cultural Features and street names derived from Thomas Bros. data. Licensed for use to Los Angeles County - all rights reserved. All parcel data derived from the Assessor's Office. Current as of December, 2008.

NOTES ON BASE MAP:
Parcel boundaries are from the parcel database maintained by the Department of Public Works or the Assessor's Office and may differ slightly from recent updates of House Numbering Maps. Parcels on this map reflect the most recent updates from the Assessor's Office as of December, 2008.
Dashed lines represent additional parcel line work such as easements, colored lines, lot lines, subdivision boundaries, and tax rate area lines.
