1		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	8533-010-912	(Santa Fe Dam Recreation Area)	San Gabriel Canyon	Add Developed Areas to SEA Development Map	Adjustment Made	3/20/2014	No	No	Yes	No	Include picnic areas and structures in the Development Map. These areas are clearly developed.
1		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	8533-010-914	(Santa Fe Dam Recreation Area)	San Gabriel Canyon	Add Developed Areas to SEA Development Map	No Adjustment	N/A	No	No	No	No	This area is permeable and can be flooded from time to time and thus supports plants and potentially nesting birds. Parks and Rec was advised to check for the presence of these before allowing parking in this area. Special event areas should remain SEA and were not included in SEA Development Map
2		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	2865-012-916	(Castaic Park)	Santa Clara River	Adjust SEA boundaries to exclude Parks and Rec parcels	Adjustment made	3/20/14.	No	Yes	No	No	Berm acts as a clear boundary between development and SEA. Adjusted SEA boundaries to follow top of berm.
3		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	8269-040-900	(Bill Blevins Park)	Puente Hills	Adjust SEA boundaries to exclude Parks and Rec parcels	Adjustment made	3/20/14.	No	Yes	No	No	The areas within the proposed SEA contain oak trees that need to be protected. Trees in the flat area are newly planted and are not oak trees. On a small portion of the property where native vegetation had regrown, the SEA was expanded. Line was adjusted to precisely match the treeline and edge of the slope. This includes removing and adding minor edges along the SEA boundary to increase precision.
4		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	5281-029-907	(Whittier Narrows Golf Course and Recreation Area)	Puente Hills	Adjust SEA boundaries to exclude Parks and Rec parcels	Adjustment made	3/20/14.	No	Yes	Yes	No	The southernmost area adjacent to CA-60 is relatively undisturbed and is part of a movement corridor. The southernmost area adjacent to CA-60 remained in the SEA and was not added to the development map. Areas outside of the landscaped area of the golfcourse support plant and wildlife and is part of a wildlife corridor. Areas that are part of the golfcourse were added to the SEA Development Map but areas with natural vegetation should remain an SEA and not included in the SEA Development Map. (See files). The bike path is a reasonable demarcation for the boundaries. In the northern portion, the SEA boundary already follows the bike path. The area that is immediately north of the area currently proposed as SEA has been excluded from the SEA and displays similar attributes to the area on the south. SEA boundary follows the bike path. The bike path is a reasonable demarcation for the boundaries. In the northern portion, the SEA boundary already follows the bike path. The area that is immediately north of the area currently proposed as SEA has been excluded from the SEA and displays similar attributes to the area on the south.
5		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	8378-024-900	(Frank G. Bonelli Regional Park)	East San Gabriel Valley	Add Developed Areas to SEA Development Map	Adjustment Made	3/20/14.	No	No	Yes	No	Several areas in the park have been developed and were added to the SEA Development Map. The park itself will remain SEA.
6		Los Angeles County Department Parks and Rec	Joan Rupert/Julie Yom	8678-016-903	(Marshall Canyon County Park)	San Dimas Canyon/San Antonio Wash	Add Developed Areas to SEA Development Map	Adjustment Made	3/20/14.	No	No	Yes	No	Tree Farm area is used for trees planted on containers, not on the ground. These areas meet the criteria for inclusion in the SEA Development Map. The tree farm area has been added to the SEA Development Map
7		Keith Campeau		3209-013-010		Santa Clara River	Added Developed Areas to SEA Development Map	Adjustment Made	3/24/2014	No	No	Yes	No	Areas added have been graded. Areas added to the SEA Development Map
8	#13, 8	SoCal Gas	Glenn La Fevers, Storage Operations Manager	2821005801		Santa Susana Mountains and Simi Hills	Adjust SEA boundaries to exclude SoCal Gas properties.	Pending Regional Planning Commission	Pending	No	No	No	No	Areas which are indicated within the operator's permits will be added to the SEA Development Map. The SEA boundaries will not be removed.
9		Rose Hills Memorial Park and Cemetery	Jeff Nordschow	8125025906	Whittier	Puente Hills	Asked DRP to review SEA in area, as a cemetery permit exists on the whole lot. The boundary of the proposed SEA is confined to the undeveloped portion of the lot. Note there is small amount of mapped SEA developed area on parcel 8125-025-906 which may be overlapped fuel modification from nearby structures, and which we may wish to remove. To be consistent with the SEA, the full extent of the grant of the Cememtery Permit ought to be mapped on the SEA Development Map.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	No	Yes	No	Met with Rose Hills. Agreed to keep proposed SEA boundaries, with the assurance from DRP that it will not impact their Cemetery Permit. Letter written to Rose Hills dated March 27, 2014. Areas which are within the operator's permits will be added to the SEA Development Map.

10	24	Request 10 is folded into Request 24					N/A Request was the same as request #24							
11		Hanh Tran		3084-018-019	Black Butte	Antelope Valley SEA	Requests exclusion.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No reason for request given, request does not meet the adjustment rationale. No further action required.
12		Cook Hill Properties	Susan Lindquist, Director of Community Development	5271-001-030	City of Montebello	Puente Hills	"request the elimination of the Montebello Hills Specific Plan property as described above from within the Puente Hills SEA boundary."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action required. The proposed SEA for these parcels is within the incorporated City of Montebello. Mapping for the incorporated portions of the SEAs were based on incorporated city input and historic SEA locations. Staff is not recommending changing these parcels at this time.
13	#8, 28	Termo	Ralph Combs, Manager, Corporate Development The Termo Company	2826017031	Oat Mountain/Simi Hills (City of LA and County of LA line)	Santa Susana Mountains and Simi Hills	Request removal/adjustment of the SEA Boundary	Pending Regional Planning Commission	Pending	No	No	Yes	No	Areas which are within the operator's permits will be added to the SEA Development Map. However the SEA boundaries will not be removed.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	4211-014-901	Ballona Wetlands Area B, City of Los Angeles (Playa Del Rey)	Ballona Creek	Add to SEA: AREA B & Ballona Creek Estuary Channel - Area B includes the historical Centinela Creek slough channel, as well as nesting Belding's Savannah Sparrow, which is on the state endangered species list, and also hosts nesting Least Bell's Vireo, which is on the federal and state endangered species list. Also documented on site in Area B are the federally listed El Segundo Blue Butterfly and the Orcutt's Yellow Pincushion, a coastal wildflower species which was elevated to increased imperiled status by the state of California botanist during the last few years. Additionally, dozens and dozens of bird species have been documented here – everything from migratory song birds to water birds and shorebirds. Black-bellied Plover – anywhere from 1,200 to 2,000 winter in the salt panne and along the Ballona Creek estuary each winter. Migratory Monarch Butterflies inhabit the Eucalyptus Grove each year on the southern edge of Area A. Area B also includes numerous endemic plant species and several small mammals of the Los Angeles coast that are gone from other locations – such as the South Coast Marsh Vole.	Pending Regional Planning Commission Decision on 8/6/2015	N/A	No	No	No	No	No adjustment recommended. All the Ballona/ and Lagoon Areas the Sierra Club requests changing are outside the historic SEAs, all of which are outside of County Jurisdiction. Most parcels belong to governments and are managed by both local and state agencies and it is to be acknowledged are of significant ecological value. It is worth noting, the most recent SEA map designation and descriptions have relabeled all SEAs within California Coastal Zones as Coastal Resource Areas (CRAs) to acknowledge that these areas are governed primarily through the California Coastal Act and California Coastal Commission. At this time it is not our recommendation to add these areas as the rationale for changing the proposed map in incorporated areas does not support this. However, staff would recommend that areas with demonstrated biological value such as these might be appropriate to re-examine after the SEA Program and General Plan Updates are adopted during the biennial report on the status of the SEAs.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	4211-007-915	Ballona Wetlands Area C, City of Los Angeles (Playa Del Rey)	Ballona Creek	Area C – Area C is home to a significant population of the rare Lewis' Primrose. As well, the endangered California Gnatcatcher has been documented on site. In addition, numerous other birds use this area for foraging and shelter. White-tailed Kite, Loggerhead Shrike, Great Blue Heron and others are included. The site includes a historical tributary from the Los Angeles River from old maps of the area.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	See previous response.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	4116003900	Del Rey Lagoon, City of Los Angeles (Playa Del Rey)	Ballona Creek	Del Rey Lagoon – Once part of a 3-mile long lagoon system that was set back from the sea by a stretch of dunes, this lagoon at the southern end of the system is subject to full tidal influence and is a rich feeding and resting ground for migrating birds, as well as for resident species. Belted Kingfisher, American Wigeon, Long-billed Dowitcher, Snowy Egret, Great Egret, American Coot, Burrowing Owl, Bufflehead Duck and California Ground Squirrel are among the species that use this lagoon wetlands ecosystem	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	See previous response.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	4295001904 Indicator APNs only, please see notes and file	City of Los Angeles (Venice)	Ballona Creek	Ballona Lagoon Marine Preserve – Across the Marina entrance channel from Del Rey Lagoon, this is the middle part of the once 3-mile long lagoon system and it is a shorebird haven, with numerous sandpipers like Marbled Godwit, Willet and Long-billed Curlew coming to this part of Los Angeles for the winter. In addition, a newly-fenced off sanctuary for the Orcutt's Yellow Pincushion offers a glimpse of the nature of the historical sandy dune areas that once graced the edges of what was called Ballona Lagoon and Ballona Lake on historical maps.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	See previous response.

14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	4117022904 (may be indicator APN only?)	City of Los Angeles (Next to LAX/EI Segundo)	El Segundo Dunes	Playa del Rey Sand Dunes – Sometimes called the Airport Dunes or the El Segundo Dunes, these sand dunes created once by the mighty flow of the Los Angeles River and the convergence at Playa del Rey of this river along with several other streams, are known to locals as the Playa del Rey Sand Dunes. Most famous for a tiny butterfly that feeds on a special variety of coast buckwheat, the El Segundo Blue Butterfly, which is on the federal endangered species list, these dunes are bit a remnant of a significant sand dune complex that once went southward all the way through the south bay beach cities. Actually, the sand dunes are still there, but they are paved over and built on, so these dunes offer a glimpse into our historical ecology and natural history. Restoration efforts have assisted a partial recovery of the endangered butterfly and have brought recognition to other species of plants and animals that are in need of protection at this site. Once partially covered by houses, but returning to their natural condition more and more, these dunes are a natural treasure on the Los Angeles coast. Toes Beach Dunes – The last remnant foredune on a Los Angeles beach that is wild and natural, this small sand dune includes a rare dune beetle, as well as a magenta sand verbena that is rare. Bird species from Del Rey Lagoon are often seen foraging or resting in these dune areas. Westchester Parkway Dunes – Sandy dune swales and pocket wetlands are part of this interesting sand dune area that is north of LAX and has been recovering as natural habitat since homes were removed from the area due to LAX. Bird observations include White-tailed Kite, Loggerhead Shrike, Red-Shouldered Hawk, Ferruginous Hawk and Great Blue Heron.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	Yes	No	No	No	The El Segundo Dunes area is part of a historic incorporated SEA. It was adjusted during the mapping prior to 2011, and appears to now conform more precisely to certain preserved areas, however there are portions of the historic SEA which appear to be excluded from the new map. Staff is willing to recommend adding the currently excluded portions and any other areas that are protected from future development provided that the parcels are publicly owned and staff can contact someone with management responsibility for this area who does not object. If there are good reasons not to include the rest of the El Segundo Dunes, staff recommends that this area be added to potential post-General Plan adoption sites to consider.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	8675023903 Indicator APN only.	Claremont Hills Wilderness Park, City of Claremont	San Dimas Canyon and San Antonio Wash	We support the inclusion of the open space area north of Claremont between the eastern area of the SEA, Miller Ranch Rd. and the Northeast La Verne portion of the SEA. It appears this area at the base of the San Gabriel Mountains is open space and is not included in the SEA. This area would add connectivity between the eastern portion of the proposed SEA and the area of Northeast La Verne	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No adjustment recommended. Proposed area is within an incorporated city. It is preserved and does add connectivity however it does not meet the rationale of addition because it is not a historic SEA, nor was it added prior to 2011. However, staff would recommend that conserved areas with demonstrated biological value such as these might be appropriate to re-examine after the SEA Program and General Plan Updates are adopted during the biennial report on the status of the SEAs.
14	#25, 26, 34	Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	8269001004	Rowland Heights/LaHabra Heights Island	Puente Hills	It is stated in the Proposed Technical Appendix E for the proposed SEA boundary east of Harbor/Fullerton: "The southern boundary includes the canyon, but excludes the hills and grasslands of the oil field that are on the ridgeline and south of the canyon." But the exclusion of this property south of the canyon should be changed. The current boundaries allow for only a single narrow canyon for wildlife movement, bordered on the north side by a housing development. This area's importance for wildlife movement has been documented. Therefore the southern boundary of the SEA east of Harbor/Fullerton should extend all the way to the County line.	Hold for further review.	Hold.	No	No	No	No	Staff has received several requests to re-examine this area. The boundary at this location runs along a ridgeline demarcates a watershed, however several groups have submitted scientific materials arguing that this location would meet other SEA criteria and goals. Staff is reviewing these materials and would be willing to consider adding this portion to the SEA if the materials are substantive.
14	#32	Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	8125023902	Puente Hills	Puente Hills	We believe the area of the Puente Hills SEA should be increased by including the disposal portions of the Puente Hills Landfill and combining the Rio Hondo SEA to the Puente Hills SEA.	Hold for further review.	Hold.	Maybe	No	Maybe	No	These parcels are landfill. Portions of the landfill areas are disturbed. In the PDF file for this request, there do seem to be natural portions on the eastern and northern parts of parcels 8125023902 and 8125022901. Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.

14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	8221021010	Oak Canyon, Hacienda Heights	Puente Hills	Add the grove of buckeye trees in the small side canyons to Oak Canyon- The majority of these trees (60-80 in number) are located in two small side canyons to Oak Canyon that drain from Edgeridge Avenue near its junction with Horticultural Drive to cross Tamarix Avenue near its junction with Oak Canyon Road. This scattered distribution might suggest that these trees may be a remnant population from a time when different climatic conditions allowed them to be distributed more widely than they currently are. In any case, further evaluation by a biologist, including possible genetic testing to ascertain their ancestry, would seem to be in order.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	Staff does not agree with Sierra Club that these trees are " a remnant population from a time when different climatic conditions allowed them to be distributed more widely than they currently are", and has information to indicate that that the buckeye grove trees come from historic human activity. As a result these trees do not meet the SEA designation criteria and staff does not recommend adding this area at this time. However, it is possible that this site meets the criteria for archeological areas of interest and could be added to any lists maintained by the General Plan of such sites.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	8113025900- indicator APN only, please see notes and file.	Channels of the San Gabriel River/Whittier Narrows adjacent, City of El Monte	Puente Hills, San Gabriel Canyon	In addition we believe the channels and open space along the San Gabriel River be added to an SEA unit to connect the Puente Chino Hills with the San Gabriel Mountains along sediment lined channels.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	This area does not meet the rationale for expansion- it is in incorporated city areas and not a part of any historic SEA. The potential for connectivity as suggested by Sierra club makes this a good candidate for re-examination after the General Plan is adopted, in future SEA status reviews.
14	#28	Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	2821008905 Indicator APN only, see request and file	Oat Mountain/Simi Hills County of LA line	Santa Susana Mountains/Simi Hills	The land south of Oat Mountain along Browns Canyon Road, should also be included in this SEA since it has been habitat to native flora and fauna and has many native trees such as Sycamore. It is part of the wildlife corridor. Much of the valley floor should be protected as well as the steep slopes in order to facilitate wildlife migration	Hold for further review.	Hold.	Maybe	No	No	No	Staff has received several requests to re-examine this area. The boundary at this location runs along a watershed, however several groups have submitted scientific materials arguing that this location would meet other SEA criteria. Staff is reviewing these materials and would be willing to consider adding this portion to the SEA if the materials are substantive.
14		Sierra Club	Joan Licari, Chair /Eric Johnson, Chair / Marcia Hanscom, Ballona Wetlands Restoration Committee / Terrie Brady, San Fernando Valley Group	2528005900	City of Los Angeles, Hansen Flood Control Basin.	Tujunga Valley/Hansen Dam SEA	The Big Tujunga Wash is one of the few places where this flower Slender Horned Spineflower has the conditions it needs for germination namely periods of flood followed by periods of drought.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action. As far as staff can determine the Tujunga Wash is already within a historic SEA which has not been changed on the proposed SEA Map. Unless further information is submitted staff believes this request is satisfied.
15		Meridian Energy USA	Mark Stout, Director Project Development	none given	none given	Antelope Valley SEA	"Meridian Energy USA, Inc. holds an option to purchase approximately 2,000 acres within the Antelope Valley Area Plan study area. These optioned lands, herein referred to as the "Study Area," are located along East Palmdale Boulevard at 240th Street East, County of Los Angeles, California" (Land was all designated as ETA in 2012, portions in existing Desert Montane Transect SEA)Meridian Energy supports the County of Los Angeles in the proposed modification that would reduce the amount of the Study Area that would lie within boundaries of the Desert Montane Transect SEA. The areas that are proposed for removal from the designation are used as active agricultural lands and do meet SEA designation criteria as defined by the General Plan Update 2035. Furthermore, conclusions of reconnaissance level surveys indicate no difference between the portion of the Study Area that is proposed to be designated as an ETA of the Desert Montane Transect SEA and the area that is to be removed entirely from designation as both areas currently function as active agricultural lands.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	Insufficient information was available and attempts at contacting the requestor were unsuccessful. Staff has not seen the studies mentioned in the letter.
16		Center for Biological Diversity	Ileene Anderson	N/A		All SEAs	In our quick review of the proposed SEAs we strongly suggest that the County include all habitat including but not limited to federally designated critical habitat for federally and state listed endangered species. Including habitat for these species that are teetering on the brink of extinction identifies areas in the County that are crucial to the goals of the SEAs - "to ensure that development activities in these areas do not unduly compromise the underlying ecological systems of the County in such a manner that would threaten the future existence of these systems" (DSEA Ordinance at pg. 3). It also flags areas that will be challenging for development due to the presence of state and federally protected species. To be clear these are not the only areas that need to be included in the SEAs, but rather the SEAs should definitely include these types of areas.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No specific SEAs identified for modification of boundaries. The request is too broad and would require redefinition of the criteria used to designate SEAs and thus a recreation of the entire designation process, a public process dating back to 2011.

17		Forest Lawn-Hollywood	George Mhlsten, Latham and Watkins	5581007018		Griffith Park	Given the long-standing approval of the cemetery by the City and the measures implemented by Forest Lawn to protect and restore the natural resources, we request that the SEA designation exclude the Forest Lawn property and that the proposed SEA ordinance amendment include an exemption for cemeteries.	Adjustments Made	3/24/14.	No	Yes	No	No	Department response letter sent on August 23, 2013. Developed portions which did not meet the SEA Criteria were taken out of the SEAs. This area is within the City of Los Angeles.
18		Forest Lawn- Covina Hills		8710001030		East San Gabriel Valley	"We request that the Forest Lawn cemetery be excluded from the SEA designation and that the proposed SEA ordinance amendment include an exemption for cemeteries that are approved by the County pursuant to the Permit Protocol"	Adjustments Made	3/24/14.	No	Yes	No	No	The Department corresponded with Forest Lawn Covina in August of 2012. During the last few months staff reviewed the site and noted that areas along the edges of the proposed SEA boundary are already being developed. The DRP staff biologist recommended adjusting SEA boundaries to Vesper Road. Changes were made in March 2014, however, staff is rechecking the boundary adjustments for more recent aerial photographs and may make a site visit if necessary to confirm these edges are accurate to the developed area.
19		Sky Meadow Farms	Lisa K. Bell	3215-003-010		San Andreas	Request was forwarded, it's a request specific to the Antelope Valley Area Plan and a response letter from that planner is included in the file.	No Adjustment	N/A	No	No	No	No	No further action recommended. This is an issue with the Antelope Valley Area Plan, not the SEA Boundaries.
20		Pardee Homes	Michael V. McGee, President and CEO	N/A		All SEAs	Requests the removal of all properties in all proposed SEA that are not specifically analyzed at a parcel level.	No Adjustment	N/A	No	No	No	No	No further action needed. No specific SEA identified for modification of boundaries. Requests a change to the methods used to map the SEAs, which the Department will not be undertaking.
20		Poppy Reserve/Mojave Desert Interpretative Association	Margaret Rhyne	3236014904	Antelope Valley California Poppy Reserve	San Andreas SEA. Joshua Tree Woodlands SEA	"This change would prevent SEATAC assessment of potential impacts by proposed development adjacent to protected habitat areas such as the Antelope Valley California Poppy Reserve and Ripley Desert Woodland. Both of these parks are included in existing SEAs but the borders of these SEAs do not extend significantly beyond the existing borders of these state parks. Even with the approval of the proposed extension of SEAs in the Antelope Valley, these state parks will remain vulnerable along most of their borders. Therefore, SEATAC review and assessment of the impacts of development adjacent to these important biological preserves remains imperative." Request asks that surrounding parcels be covered by the SEA ordinance in some way. The primary method of considering these edge parcels would be by expanding the boundary.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	This area is currently within an SEA. The areas outside the conservation area are privately owned and do not meet the criteria. Staff does not recommend adjusting at this time.
21		Poppy Reserve/Mojave Desert Interpretative Association	Margaret Rhyne	3238016904	Ripley Desert Woodland State Park	San Andreas SEA. Joshua Tree Woodlands SEA	"This change would prevent SEATAC assessment of potential impacts by proposed development adjacent to protected habitat areas such as the Antelope Valley California Poppy Reserve and Ripley Desert Woodland. Both of these parks are included in existing SEAs but the borders of these SEAs do not extend significantly beyond the existing borders of these state parks. Even with the approval of the proposed extension of SEAs in the Antelope Valley, these state parks will remain vulnerable along most of their borders. Therefore, SEATAC review and assessment of the impacts of development adjacent to these important biological preserves remains imperative." Request asks that surrounding parcels be covered by the SEA ordinance in some way. The primary method of considering these edge parcels would be by expanding the boundary.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	No	No	No	No changed recommened at this time, however staff is review the connection points between Ripley Desert Woodland park and other parks and preserved areas to see if there are parcels which should be re-examined. If the parcels are not privately owned and contain resources, staff may recommend adjusting the boundaries in this areas to increase connectivity.

Comment ID	Related Comments	Commentor	Contact Name	Reference APN	Location	Proposed SEA Name	Comment	Action	Map Change Date	Recommend Adding To SEA	Recommend Removing From SEA	Recommend Adding to Development Map	Recommend Removing From Development Map	Recommendation Reason
22		Tejon Ranch	Michael Josselyn, PhD, WRA Environmental Consultants	none given	Cenntenial Project area.	San Andreas SEA	Removal from SEAs, suggests SEA designation does not meet the criteria, area inside the Tejon Ranch are not rare habitats. Contends the existence of wildlife corridors inside the site, areas of Tejon Ranch set aside in conservation agreements with other groups are not the same areas as the SEAs.	Not Adjusted	N/A	No	No	No	No	No adjustment recommended. Our department does not come to the same conclusion regarding the value of the site. Although grasslands are not rare in CA, SEAs assess resources of relevance to LA County. Additionally, we do not consider the presence of grazing a reason to find a site lacks biological value some degradation of the resource does not negate the resource. Lastly, conservation agreements made with other groups may prioritize separate resources from those our department assesses. Conservation agreements with independent private groups or stakeholders are helpful context, in determining resource locations, but ultimately remain separate from the Department's mission and context.
23		Tesoro del Valle	John E. Evans, Montalvo Ventures	3244-160-026	San Francisquito Creek	Santa Clara River	Requested removal because the boundary expansion is, " Not in compliance with the active vesting tentative tract map #51644, certified EIR, Seatac review, and environmental approvals I permits; Encroachment into the existing and planned development areas, such as two residential lots in planning area D; and not in alignment with the Floodplain and related resource area in the SFC Creek, the defined area to protect the migration path of the unarmored threespine stickleback fish, and extends into the high land area outside of the water course and habitat for migration." Lot # 702, Tax Assessor Parcel # 3244-030-003, and there should be a fuel mod designation area added too; Lot # 703, Tax Assessor Parcel # 3244-027, and 2810-001-035 & 040.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	No	Yes	Yes	No recommended change to the SEA boundary. The properties are within the Santa Clarita Plan Area, which was updated in 2012 and the proposed SEA boundaries went into effect in this area at this time. Only minor changes were made to the existing San Francisquito Canyon SEA under the update, and the resource is well documented. Staff recommends adjusting the SEA Development Map for this area, to better reflect the location of actual development. Such adjustments would include building pads and drainage areas which are not currently captured and would exclude areas currently mapped as developed which appear undisturbed and are currently in the ownership of a conservation authority. Staff will also review the permits for these areas to ensure permitted areas are correctly reflected on this map.
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8126001904		Puente Hills	Requests that all PHHPA owned or controlled parcels be included in the SEA.	Adjusted	3/26/14.	Yes	No	No	No	Changes made to include PHHPA owned parcels. As the parcels are owned by a conservancy and are located within and adjacent to the proposed Puente Hills SEA, staff agreed with this recommendation and made the changes.
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8125024907		Puente Hills	Requests adding city of Whittier owned open space to create connectivity in this area	Adjusted	3/26/14.	Yes	No	No	No	Staff has added this area because it is managed open space land between two conservancy incorporated areas. However staff recommends following up with the City of Whittier to ensure that this action is appropriate as the area is in incorporated jurisdiction.
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8221003900		Puente Hills	Requests that all PHHPA owned or controlled parcels be included in the SEA.	Adjusted	3/26/14.	Yes	No	No	No	As the parcels are owned by a conservancy and are located within and adjacent to the proposed Puente Hills SEA, staff agreed with this recommendation and made the changes.
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8266001907		Puente Hills	"Some existing fuel modification zones are mapped, and others are missing. Since fuel modification practices are exempt activities, please remove from the map all fuel modification areas that are identified as developed that are on Habitat Authority properties. Since the Habitat Authority will not be allowing expansion of development activities within fuel modification zones on lands managed/owned, this layer on the map needs to be adjusted."	Adjusted	3/26/14.	No	No	No	Yes	For Water Tanks, only the actual tank and the surrounding developed pad shall be included in the SEA Development Map. Fuel Mod areas of Water Tanks shall be excluded from the SEA Development Map.
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8267017904		Puente Hills	"Some existing fuel modification zones are mapped, and others are missing. Since fuel modification practices are exempt activities, please remove from the map all fuel modification areas that are identified as developed that are on Habitat Authority properties. Since the Habitat Authority will not be allowing expansion of development activities within fuel modification zones on lands managed/owned, this layer on the map needs to be adjusted."	Adjusted	3/26/14.	No	No	No	Yes	Removed parcel from SEA Development Map.

24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8291040001		Puente Hills	The boundary of the SEA at this location is questionable as it touches 16199 Aurora Crest, an existing home .	Adjusted	Pending	No	Yes	No	No	Staff concurs, adjusted the edge of the SEA to the parcel lines for this dense subdivision area to be consistent with how other subdivisions boundaries were mapped.	
24		Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8289006003	Hacienda Heights Turnbull Canyon Road	Puente Hills	Please add this area back into the designated SEA as any future development here would most likely require fuel modification clearance on Habitat Authority property and which subsequent permission for such clearance would be denied by the Habitat Authority	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	This parcel is privately owned. Only portions of this parcel are within the proposed SEA. The Puente Hills habitat Authority owns a smaller parcel to the south west of this parcel and would like the boundary adjusted to align with the current adopted SEA boundary . However the proposed SEA is much larger than the current adopted SEA within this area. At this time, staff does not recommend increasing the boundary of the proposed SEA on this parcel.	
24	#14, 25.	Puente Hills Habitat Preservation Authority	Bob Henderson, Chairman / Lizette Longacre, Ecologist	8125021942		Rio Hondo College Wildlife Sanctuary	Add landfill to SEA.	Held for further review	Hold.	No	No	No	No	#14, 25. Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.	
25	#14, 24, 32	Hills for Everyone	Claire Schlotterbeck, Executive Director	8269001004	Rowland Heights/LaHabra Heights Island	Puente Hills	HFE is disappointed to see the exclusion of land on the south western portion of the Aera property. Instead we support retaining the entire AERA property into a SEA as described on pages 2 to 6 in the attached letter from the Habitat Authority dated 8/29/07	Held for further review.	Hold.	No	No	No	No	See #14. Staff has received several requests to re-examine this area. The boundary at this location runs along a ridgeline demarcates a watershed, however several groups have submitted scientific materials arguing that this location would meet other SEA criteria and goals. Staff is reviewing these materials and would be willing to consider adding this portion to the SEA if the materials are substantive.	
26		Aera Energy LLC	Jeffrey R. Plaisch, Project Manager	8269006002		Puente Hills	"Aera's consistent assertion that the AMPC property does not for the most part represent the type of high quality, undisturbed habitat that the SEA program is intended to protect...[the parcels owned by the company] are degraded and impaired, and are not contributing significantly to biological diversity or sustainability."	Pending Regional Planning Commission Decision on 8/6/2015	N/A	No	No	No	No	County staff does not agree with the assertion that the property is too degraded to constitute an SEA. The resources on the site have been documented within the 2000 SEA Update Study and additional studies have been provided which establish the biological value of the site. Staff does not recommend removal of these parcels from the SEA. Staff is willing to add areas in operating under specific use permits or specific sites of grading and disruption to the SEA Development Map.	
27	This suggestion was an internal departmental suggestion. Staff does not have any recommendations to make at this time which are generated by internal review.														
28	#14	Chatsworth Nature Preserve	Carla Bollinger and Mark Osokow	2004-025-900		Santa Susana Mountains/Simi Hills	Woolsey Creek and Box Canyon Creeks, for example, are each subtended by their own sub-watersheds, yet both seem to be included in the SEA, along with the Browns Creek sub-watershed. Mormon Canyon is extremely valuable wildlife habitat -- with a perennial creek flowing even in this driest of drought years, dense riparian areas, oak woodlands, etc. -- that, based on a recent San Fernando Valley Audubon Society survey (see e-bird), supports an abundance of bird species; including raptors. We believe it should be included in the SEA. What would be needed to change the boundary of the SEA to bring that about or to assure its inclusion in a separate SEA?	Held for further review.	Hold.	Maybe	No	No	No	No	See request #14. Staff has received several requests to re-examine this area. The boundary at this location runs along a watershed, however several groups have submitted scientific materials arguing that this location would meet other SEA criteria. Staff is reviewing these materials and would be willing to consider adding this portion to the SEA if the materials are substantive.
29		Santa Paula Creek Mitigation Bank	Richard Lyons	3277001005		Joshua Tree Woodlands	Add to Joshua Tree Woodlands SEA	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. These parcels are in escrow by a private mitigation bank for purposes of mitigation land in the future. This might be appropriate to add to the SEAs in the future if/when escrow closes and if the land meets the SEA criteria, however at this time staff has no confirmation that these resources are in active conservation management.

30		California Native Plant Society	Betsey Landis, Conservation Committee	5571024900		Griffith Park	Mountain lion (Puma concolor) is the top carnivore in Griffith Park. Please add it to the list of mammals. I ask that you consider expanding the Griffith Park SEA to include small undeveloped areas between residential development in canyons and parks along Mulholland and on the ridges. I have seen evidence and CNPS comments on L.A. County General Plan, Feb. 3 2014, page 2 been given evidence that mountain lions travel along Mulholland and may have cubs in locations like Stone Canyon. There are rare plants along the way as well. Braunton's type location for the milkvetch named after him is in the Santa Monica Mountains, probably near Mulholland's first reservoirs in Franklin Canyon. I haven't found it yet, but the soil is the right type.	Pending Regional Planning Commission Decision on 8/6/2015	N/A	No	No	No	No	No further action recommended. The undeveloped areas mentioned by Ms. Landis are not part of a historical SEA, are within incorporated Los Angeles and many are privately owned. At this time we do not recommend adding any to the SEA map. However, several parcels are owned by conservancies. In the future following adoption of the General Plan if the SEA boundaries are re-examined in incorporated areas, these conservancies may wish to request being designated as SEAs. Staff would recommend that areas with demonstrated biological value such as these might be appropriate to re-examine after the SEA Program and General Plan Updates are adopted during the biennial report on the status of the SEAs.
30		California Native Plant Society	Betsey Landis, Conservation Committee	4490-024-901	Mandeville Canyon	Santa Monica Mountains	Please add the east and west ridges around the head of Mandeville Canyon to this SEA. There is a very rich west-east wildlife corridor extending from Topanga State Park through Rustic, Sullivan, and Mandeville Canyons with an excellent range of habitats. It includes San Vicente Mountain Park and the undeveloped area above Encino Reservoir.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	Yes	No	No	No	Recommend adding to the SEA (provided that there are no issues raised by the County department which manages these parcels). Although these are located within the incorporated city of Los Angeles, they are owned by the County of Los Angeles and are contiguous with conservancy maintained land and the proposed SEA.
30		California Native Plant Society	Betsey Landis, Conservation Committee	4490011904	Mandeville Canyon	Santa Monica Mountains	Please add the east and west ridges around the head of Mandeville Canyon to this SEA. There is a very rich west-east wildlife corridor extending from Topanga State Park through Rustic, Sullivan, and Mandeville Canyons with an excellent range of habitats. It includes San Vicente Mountain Park and the undeveloped area above Encino Reservoir.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	Yes	No	No	No	Recommend adding (provided there are no issues raised by the Mountains Recreation and Conservation Authority). These properties are maintained by the Mountains Recreation and Conservation Authority, a conservation group. We recommend contacting them in order to see if they wish to be included in this SEA, as neighboring parcels under their ownership are within the proposed SEA.
31	37	LAC DPW	Christopher Sheppard, Environmental Programs Division	2826028030		Santa Susana Mountains/Simi Hills	Remove Sunshine Canyon Landfill parcels from the SEA	Held for further review.	Hold.	No	No	No	No	Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.
32		Sanitation Districts of Los Angeles County	Wendy Wert	(Indicator APN Only, see full list under request)	Roosevelt/Edge of Edwards Airforce.	Antelope Valley SEA	Lancaster Agricultural Site. Figure 1 depicts property that Sanitation District No. 14 has developed or intends to develop for agricultural operations using recycled water. The smaller portion labeled A is a site developed with a recycled water storage tank and pump station to serve the agricultural site. We request that the SEA boundary be adjusted to exclude the red hatched areas, which are part of the agricultural site or its supporting facilities.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	No	Yes	No	These areas are in the FEMA Floodplain. It would not be consistent with how the Antelope Valley SEA was designated to remove it. However the western portion seems to include additional disturbed areas which would be appropriate to add to the SEA Development map.
32		Sanitation Districts of Los Angeles County	Wendy Wert	3372002901 (Indicator APN Only, see full list under request)	Near Hi Vista, Antelope Valley	Antelope Valley SEA	Palmdale Water Storage and Agricultural Sites. Property developed for recycled water storage reservoirs is depicted in Area A on Figure 2. As an existing use, this area should be removed from the SEA boundary or exempted as an existing use at the time the expanded boundary went into effect. Areas B and C on Figure 2 depict land purchased and designated for agricultural operations using recycled water. As these parcels were purchased as part of an approved Facilities Plan and EIR to serve a public need, we believe it would be inappropriate to add a SEA designation to this property now and potentially jeopardize the implementation of this approved public project. This request is consistent with Regional Planning's Conservation and Open Space Element Policy COS 1.4: Promote the use of recycled water, where available, for agricultural and industrial uses and support efforts to expand recycled water infrastructure (Chapter 4 at p.27) of the May 2, 2013, Draft Antelope Valley Area Plan. The Districts requested these same adjustments in a comment letter dated August 30, 2007; however, the adjustments have not been incorporated in this iteration.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	No	Yes	No	Staff does not recommend removing this area from the SEA, however, given the existing facility permitting, staff recommends adding these areas to the SEA Development Map (Area A, B & C) The reservoir itself is on the SEA Development Map, it would be appropriate to expand to the given area of operation either as SEA AG or SEA Developed, which is staff's recommendation.

32		Sanitation Districts of Los Angeles County	Wendy Wert	2826005902 (Indicator APN Only, see full list under request)	Near Stevenson Ranch on the Santa Clara River	Santa Clara River SEA	Valencia Water Reclamation Plant (WRP). The Valencia WRP is shown in Figure 3. We appreciate Regional Planning's prior efforts to retract the SEA boundary to exclude the Valencia WRP. We request small additional adjustments shown as red hatching to eliminate encroachment onto the Valencia WRP parcel. While the areas shown in green are conservation easements and will not be developed, we request that the SEA boundary not encompass those areas because the current proposed ordinance requires a SEA review process for any work on a parcel that has even a minute coverage by a SEA. Requiring such SEA reviews for an active water reclamation plant would not be in the public's best interest.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended This area was adopted in OVOV and is already in effect. The portions of the parcel requested for adjustment are under conservation easements. There is no rationale for removal of conservation land from an SEA.
32		Sanitation Districts of Los Angeles County	Wendy Wert	2052011903	Calabasas	Santa Monica Mountains	Calabasas Landfill. The active Calabasas Landfill is shown in Figure 4. We appreciate Regional Planning's prior efforts to adjust the SEA boundary to exclude the Calabasas Landfill. We request a slight adjustment to the proposed SEA boundary (shown hatched in red) so that the boundary does not encroach on landfill property.	Held for further review.	Hold.	No	No	No	No	Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.
32		Sanitation Districts of Los Angeles County	Wendy Wert	5271009900	Whittier Narrows	Puente Hills	Whittier Narrows WRP. The Whittier Narrows Water Reclamation Plant is shown in Figure 5. We request that the red hatched area be removed from the proposed SEA boundary. Without such adjustment, any work on this active WRP would require SEA review under the current proposed ordinance and such reviews would not be in the public's best interest.	Pending Regional Planning Commission Decision on 8/6/2014	Pending	No	Yes	No	No	Staff is willing to recommend adjusting the SEA boundary in this location to match the edge of the bike path where the resources are located mostly on one side. However, portions of this area have significant vegetation along it, and staff does not recommend adjusting the majority of this site.
32	#14, 24, 25	Sanitation Districts of Los Angeles County	Wendy Wert	8125023902 (Indicator APN Only, see full list under request)	Hacienda Heights	Puente Hills	Puente Hills Landfill. The Puente Hills Landfill is shown in Figure 6. While this landfill has stopped receiving waste, there will be ongoing maintenance and post-closure construction projects for years to come. Similar to previous comments, we request that the red hatched area be removed from the proposed SEA extents so that SEA does not encroach on landfill property and trigger SEA reviews for routine work onsite.	Held for further review.	Hold.	No	No	No	No	See request #14, 24, 25, Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.
33		Windsor Pacific LLC	Allen Hubsch	3211-018-047	Outside of Agua Dulce	Santa Clarita River SEA.	Perhaps the DRP was not aware that a homesite has been developed on Lot APN 047. Attached is an aerial photo from 2008 of Lot APN 047. The photo shows the homesite located on Lot APN 047, and also the homesites on some nearby lots. The homesite on Lot APN 047 should qualify as Developed Area just like the homesites on nearby lots. I can verify that the homesite located on Lot APN 047 was used as a home.	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. Mr. Hubsch says there was a homestead on the parcel in the 2008 aerial photograph. This may be the case but review of more current aerial photographs do not show anything at that location currently. Staff does not suggest changing the SEA Development Map unless more information is provided.
34	#14, 25	WILDLIFE CORRIDOR CONSERVATION AUTHORITY	Jessica Nguyen	8269001004	Rowland Heights/LaHabra Heights Island	Puente Hills	WCCA recommends the inclusion of an area east of Harbor Boulevard, in unincorporated Los Angeles County near the Los Angeles County/Orange County border (shown in the attached map).	Held for further review.	Hold.	Maybe	No	No	No	See #14, 25. Staff has received several requests to re-examine this area. The boundary at this location runs along topography which demarcates a watershed, however several groups have submitted scientific materials arguing that this location would meet other SEA criteria and goals. Staff is reviewing these materials and would be willing to consider adding this portion to the SEA if the materials are substantive.
35		Bolthouse Farms	Kimiko Lizardi	3376026009	Lancaster	Antelope Valley SEA	Bolthouse believes this is a mapping error. "If you look closely, the boundary of the "Agricultural Land" does not coincide with parcel boundaries, but overlaps a small portion of the listed properties. When a GIS based analysis is conducted, these properties are being included within the proposed SEA boundary" "As a considerable amount of time and capital has been invested pursuing these solar options, we would like to request that the County carefully review the SEA boundary in this location."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	Staff does not recommend changing the SEA Boundary at this time. SEA edge conforms to FEMA Floodplains. SEA Boundaries do not follow parcel lines. All of these parcels are also in incorporated city of Lancaster and therefore are not subject to the SEA Ordinance.

Comment ID	Related Comments	Commentor	Contact Name	Reference APN	Location	Proposed SEA Name	Comment	Action	Map Change Date	Recommend Adding To SEA	Recommend Removing From SEA	Recommend Adding to Development Map	Recommend Removing From Development Map	Recommendation Reason
35		Bolthouse Farms	Kimiko Lizardi	3376022004	Lancaster slightly north of Plant 42	Antelope Valley SEA	"We request an explanation and evidence to support the expansion of the SEA boundary in this area."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. These parcels are all part of the Antelope Valley SEA. The criteria used to establish this SEA is explained in detail in the SEA descriptions in the Technical Appendix of the General Plan, and in the 2000 SEA Update Study (on our webpage at: http://planning.lacounty.gov/sea/studies) Several of the parcels are also located within the city of Lancaster and will not be subject to the County's SEA Ordinance. All of these parcels are marked SEA Agricultural Developed Area. Staff has no changes to recommend at this time.
35		Bolthouse Farms	Kimiko Lizardi	3378005005	Lancaster slightly north of Plant 42	Antelope Valley SEA	"We request an explanation and evidence to support the expansion of the SEA boundary in this area."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. The bisection is to only include the portions of the parcel which are within the proposed SEA based on the location of water resources. The other portions of the parcels are outside the proposed SEA. The boundaries of SEAs generally follow natural features. Currently these two parcels are entirely within an existing SEA. The proposed future SEA would cover less of each parcel.
36		CalCIMA, Vulcan, Granite & Sespe Consulting	Angela Driscoll	none given	Big Rock Creek Fan	Antelope Valley SEA	"Cal Trans has recently made significant improvements to Highway 138 that crosses the existing Regionally Significant Aggregate Resource Areas E-5, E-4, E-3, E-2, and E-1 of the Big Rock Creek Fan. The result of these improvements is that surface flow of storm water runoff has been permanently and significantly reduced and is no longer alluvial in nature. This warrants removal of this area from consideration as an SEA."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. Staff has examined the documents submitted. We concur that changes have been made in the area, however, the documents do not establish that the changes will completely prevent the flow of water. The boundary of the SEA as mapped in this area is based on FEMA floodplain information which has not been changed. Staff is willing to review further documents and consult additional experts on this matter, but at this time we do not find the argument conclusive enough to warrant recommending changes to the SEA boundary.
37	31	Sunshine Canyon Operators, Republic Services	Rob Sherman	2826028030		Simi Hills SEA	"we respectfully request that proposed changes in the boundaries of the Santa Susana Mountains and Simi Hills SEA ("the SEA") adjacent to Sunshine Canyon Landfill, be eliminated and that the existing boundaries of the SEA be maintained."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	See request #31. Staff is holding final recommendations on requests for landfill adjustments in order to ensure a consistent approach to all landfill related uses and allow time to consult with the requestors.
38			Justin Lane	3036-008-042		Antelope Valley SEA	"We are making a formal request for these properties and surrounding areas that would be of potential quarry use to be removed from consideration for the new proposed SEA area."	Pending Regional Planning Commission Decision on 8/6/2014	N/A	No	No	No	No	No further action recommended. The parcels are undeveloped parcels located in the center of the proposed SEA, and do not meet the rationale for adjustment.
