

COMMUNITY ALERT NOTIFICATION SYSTEM TEST 2021

The Inglewood Oil Field is the largest urban oil field in California. This designation comes with increased responsibilities to the surrounding community in the event of an emergency. Sentinel Peak Resources, the operator of the Inglewood Oil Field, currently contracts with CodeRED to facilitate a Community Alert Notification (CAN) system to aid in communicating with our neighbors should an emergency arise. This system is intended to enable the operator to effectively and swiftly contact residents and businesses adjacent to the oil field should an emergency event take place on our property mandating evacuation, taking shelter or other protective actions. Any alert would be sent out in conjunction with local emergency management departments. The Baldwin Hills Community Standards District requires the operator of the Inglewood Oil Field to conduct a test of the CAN system each year. Below are the 2021 test results as conducted by Sentinel Peak Resources.

The test notification contact group for this year's exercise consisted of 34 contacts including Sentinel Peak Resources Employees, local fire and sheriff stations and CAP members.

SUMMARY

The test notification was received by all members of our intended audience either by email, phone or both. If you would like to sign up to be part of the CodeRED alert system to be notified should an event occur in your area, please go online and fill out the information form located here: <https://public.coderedweb.com/CNE/en-US/547421C9D6F0>

2021 Test of the Community Alert Notification System

Tue 12/14/2021 1:45 PM

To: Edgar De La Torre <EDeLaTorre@planning.lacounty.gov>

CAUTION: External Email. Proceed Responsibly.

Hello,

This is a test of the Community Alert Notification System by Sentinel Peak Resources for the Inglewood Oil field per Los Angeles County's Baldwin Hills Community Standards District. This is only a test.

This system would be activated in case of an emergency in coordination with the local emergency management department. If you have any questions or comments about this message, please contact Patty Cook at 323-298-2218.

This concludes our test. Thank you.
