RPAP2019001912	03/31/2019	Land Use Application Submission. The project is designed to reduce the impacts of illegal dumping and assist County of Los Angeles agencies, Metro, and Prime Contractors to satisfy California's 75 Percent Initiative. The project entails diverting clean earth fill away from disposal in landfills, which is inefficient, expensive and a waste of important natural resources, to a Project to Project End Use, which falls into the category of recycling consistent with State of California, County of Los Angeles and The Santa Clarita Area Plan mandates. The project will significantly mitigate illegal dumping by using a mobile platform with end-to-end use tracking, paperless invoicing, access to reports and testing, eliminate cash and credit card payments and create an illegal dumping clean-up fund. At the same time, with the importation of the clean earth fill, the project site will be developed for long-term agricultural use to farm and ranch; recovering precious agricultural lands that are being lost to urbanization and development.
