Plan/Project	Application Date	Description	Location	Applicant	Planner	Zone Code	Zoned District	SD
RPPL2019002022	04/02/2019	Los Cerritos Wetlands Restoration. The proposed program would restore wetland, transitional, and upland habitats throughout the program area. This would involve remediation of contaminated soil, grading, revegetation, construction of new public access opportunities (including trails, visitor centers, parking lots, and viewpoints), construction of flood management facilities (including earthen levees and berms and walls), and modification of existing infrastructure and utilities. Based on the findings of the Initial Study, the proposed project could have potentially significant impacts on the following environmental factors: Aesthetics, Air Quality, Biological Resources, Cultural Resources, Energy, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use and Planning, Mineral Resources, Noise, Public Services, Recreation, Transportation and Traffic, Tribal Cultural Resources, and Utilities and Service Systems.			Toan Duong

RPPL2019002069	04/03/2019	<p>The proposed project includes construction and operation of an approximately 12-megawatt (MW) power generation facility that would utilize landfill gas as fuel to generate renewable energy. The project is to be located at Scholl Canyon Landfill property. The project involves new construction activity on approximately 2.2 acres of land, including the proposed power plant facility, natural gas pipeline, water pipeline, and two water tanks. Gas generated and collected at the Landfill will be used as fuel for the proposed power generation facility. The purpose of the Project is to beneficially utilize the renewable landfill gas as fuel to generate electricity on-site instead of transferring it off-site to the Grayson Power Plant.</p> <p>The existing Landfill site occupies 535 acres with portions owned by the City of Glendale, County of Los Angeles, and by Southern California Edison Company. The Project will be located on land owned by the County.</p>	3001 Scholl Canyon Road, Glendale CA 91206		Toan Duong

RPPL2019002377	04/18/2019	<p>The proposed project is for an inert debris Type A processing operation IAW Title 14, Section17383.7. The first phase will be to create a pad of approximately 8 acres in size for the stockpile. This will be done by importing approximately 95,000 cubic yards of soil to create a suitable area for storage of the stockpiles After the pad is completed, the site will be ready to receive stockpiles of clean soil, which will be sorted on the site by soil type and other characteristics. The site would be able to receive a maximum of 1,500 tons per day of incoming materials. The hours of operation would be Monday through Saturday, from 7 am through 5 pm. Up to 8 employees would be on the site at any one time, including drivers, management and other staff. Staff would verify the loads arriving at the site and direct trucks to the debris removal area, where dirt will be screened as part of the initial recycling process. Machines will remove debris, rocks and organic materials. Then the soils will be classified by type and separated into designated stockpiles. Soils will be stored on the site until they are needed elsewhere, at which time the soil will be loaded onto trucks and transported to the destination. Up to 1,500 tons per day of materials may be exported from the project site. Employees will use portable restrooms and wash stations. Up to 50,000 cubic yards of soils may be stockpiled on the site at any one time. The anticipated life of the project is up to five years. There will be temporary facilities on</p>			Richard Claghorn		SOLEDAD	5

		<p>the site, such as a work trailer used as office, cargo container for storage, security guard control point and break area with table and cover. After closure, it is anticipated that the site may be developed as a golf course.</p> <p>Land Use Application Submission. The project is designed to reduce the impacts of illegal dumping and assist County of Los Angeles agencies, Metro, and Prime Contractors to satisfy California's 75 Percent Initiative. The project entails diverting clean earth fill away from disposal in landfills, which is inefficient, expensive and a waste of important natural resources, to a Project to Project End Use, which falls into the category of recycling consistent with State of California, County of Los Angeles and The Santa Clarita Area Plan mandates. The project will significantly mitigate illegal dumping by using a mobile platform with end-to-end use tracking, paperless invoicing, access to reports and testing, eliminate cash and credit card payments and create an illegal dumping clean-up fund. At the same time, with the importation of the clean earth fill, the project site will be developed for long-term agricultural use to farm and ranch; recovering precious agricultural lands that are being lost to urbanization and development.</p>		Preston McCormick		A-2-2
