**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Bonita Unified School District**

- 1 Please confirm the school district serves residents within unincorporated County islands in the following cities: La Verne, San Dimas. Are there any additional areas of unincorporated Los Angeles County served by the district?

The District also serves small areas of Glendora and Pomona.

- 2 Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools			4,263	x3496 4,278
Middle Schools			2,662	x2284 2,261
High Schools			3,724	x3398 3,400

- 3 Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

At current enrollment levels, existing school facilities are adequate. If enrollment increases, additional classrooms will be needed.

- 4 Please indicate the District's student generation rates for residential land uses.

Land Use	Elementary Schools	Middle Schools	High Schools
Single Family Residential	.7	.7	.7
Multiple Family Residential	.7	.7	.7

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Bonita Unified School District**

- 5 Please summarize any additional resources (facilities, personnel) needed to serve future development under the General Plan Update.

If student enrollment increases, additional teachers, classroom aides & classrooms will need to be provided.

- 6 Please describe any existing plans to expand school facilities that would serve the previously listed unincorporated communities. Please also describe the anticipated funding sources for such improvements.

Plans are in process to build gymnasiums at the two middle schools. Local bonds will be used to fund the projects. If new relocatable classrooms are needed, developer fees will be used to cover the costs.

- 7 Are fees assessed against new developments for school related services? If so, in what amount for residential and non-residential (commercial and industrial) development?

Residential fees are \$2.63 per square foot.
Non-Residential fees are \$.42 per square foot.

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Lawndale Elementary School District**

- 1 Please confirm the school district serves residents within the following unincorporated communities: Del Aire, El Camino Village, Wiseburn. Are there any additional areas of unincorporated Los Angeles County served by the district?

Not known to the District

- 2 Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools	136	86	4608	3354 3972
Middle Schools	64	24	2496	1816
High Schools	(charter school)	(charter school)	(charter school)	537

- 3 Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

yes

- 4 Please indicate the District's student generation rates for residential land uses.

Land Use	Elementary Schools	Middle Schools	High Schools
Single Family Residential	.65	.65	(charter school)
Multiple Family Residential	.65	.65	(charter school)

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Lawndale Elementary School District**

- 5 Please summarize any additional resources (facilities, personnel) needed to serve future development under the General Plan Update.

The District has reduced classrooms in grades K-3 to 24:1 and has implemented a full-day kindergarten program with resultant impact on facilities.

- 6 Please describe any existing plans to expand school facilities that would serve the previously listed unincorporated communities. Please also describe the anticipated funding sources for such improvements.

None at this time

- 7 Are fees assessed against new developments for school related services? If so, in what amount for residential and non-residential (commercial and industrial) development?

Yes, developer fees at \$2.63 per square foot for residential development and 42¢ for commercial and industrial development.

INTRODUCTION AND DISTRICT BACKGROUND

The Covina-Valley School District has contracted with Davis Demographics & Planning, Inc. (DDP) to update and analyze demographic data relevant to the District's facility planning efforts. The scope of contracted work includes: mapping the District, geocoding a student file that is usually representative of October's official head count, developing and researching pertinent demographic data, identifying future residential development plans, if any, and developing a seven year student population projection. DDP will then assist the District in developing solutions for housing future student population. This study was prepared to assist the District's efforts in evaluating future site requirements and attendance area changes.

The purpose of this report is to identify and inform the District of the trends occurring in the community; how these trends may affect future student population; and to assist in illustrating facility adjustments that may be necessary to accommodate the potential student population shifts. The District can then use this information to better plan for the need, location and timing of facility or boundary adjustments.

The **Sources of Data** section details where the two sources of data, geographic and non-geographic, are collected and how each data item is used in the seven year student population projection model.

The **Seven Year Projection Methodology** section discusses, in detail, how the factors used in the study were calculated and why they were used. These factors include: the calculation of incoming kindergarten classes, additional students from new housing (referred to as student yield), the effects of student mobility, and a detailed review of planned residential development within the District.

The **Student Resident Projection Summary** sections are a review of school year 2013-14's student resident projection results. Included in these sections are a district wide student population projection summary and a projected resident student population summary for each existing attendance area and study area.

While reading this report, it is important to remember that this is a snapshot of current and potential student population based upon data gathered in fall 2013 representing the 2013-14 school year. Population demographics change, development plans change, funding opportunities can change, District priorities can change, and therefore, new projections and adjustments to the overall Facilities Master Plan will continue to be necessary in the future.

EXECUTIVE SUMMARY

Davis Demographics & Planning, Inc. is assisting the Covina-Valley School District to plan for future student population changes. By factoring current and historical student data with demographic data and planned residential development, DDP calculated a seven year student population projection. This projection is based upon residence of the students and is designed to alert the District as to when and where student population shifts will occur.

The Covina-Valley Unified School District has had an annual decline since the 2005-06 school year. The district overall K-12 enrollment (including inter-district transfers) has dropped from a peak of 15,299 in 2005-06 to the current level of 12,546 (as of October 2013). There are many known and unknown reasons for this decline. Most notably is the rise of house prices in the mid 2000's and a drop in area births leading to smaller incoming kindergarten classes. Also, as comparatively high 6th - 12th grade classes matriculate through the system, smaller K - 5th grade classes replace them, leading to a natural decline in enrollment. With recent economic troubles; house prices are not as large of a factor in the future, but the lack of area births continues to influence future kindergarten enrollment.

The seven-year student population projection for the C.V.U.S.D. indicates continued annual decline at both the elementary and secondary school level. The overriding factor for this decline is a decrease in incoming kindergarten students and relatively smaller elementary school student population compared to secondary school population. According to ESRI's Community Analyst Online the C.V.U.S.D. area has seen a 9.1% decrease in the population between the ages of 5-10 (kindergarten through 5th grade) between 2000 and 2010. Furthermore the number of births in the area has declined from pre-2001 totals of 2,000 plus annually to the 2012 total of 1,683. This decline will result in continued relatively small future incoming kindergarten classes.

DDP has taken these factors into account and is projecting an overall K-12 enrollment decline of 11% from the 2013-14 to the 2020-21 school year. K-5 student population is forecast to stabilize and fluctuate around 5,000 students during the projection timeframe. The 6-8 grade level a decrease of 11% is predicted and the 9-12 grade level is expected to decline by 20%.

In summary, the Covina-Valley Unified School District is projected to continue to experience declining enrollment in the next few years but at a slower rate than in the recent past. The district may see a relative stabilization of K - 5th enrollment with the next seven years. The decline can be attributed to a bubble of comparatively high 6th - 12th grade classes matriculate through the system being replaced by smaller K - 5th grade classes.

It is important to note that this projection was conducted during a period of great instability in the economy and housing market. Also, this analysis was conducted after many years of declining enrollment. The nature of any forecast is to look at the past to predict the future. As the projection timeframe gets longer the accuracy may decline. Annual student population projections updates will allow the District to identify and prepare for future changes in enrollment.

SECTION ONE – METHODOLOGY

SOURCES OF DATA

Geographic Map Data

Four (4) geographic data layers were updated for use in the seven year student population projections:

1. Street Centerline Database
2. Study Areas
3. Schools
4. Students – Historical and Current

1) Street Centerline Data

The street database has associated attributes that contains, but are not limited to, the following fields: full street name, address range and street classification

The main function of the streets is in the geocoding process of the student data. Each student is geocoded to the streets by their given residence address. The geocoding process places a point on the map for every student in the exact location that student resides. This enables DDP to analyze the student data in a geographic manner.

Another vital utilization of the digital street database is in the construction of study areas. Freeways, major streets and neighborhood streets are generally used as boundaries for the study areas.

2) Study Areas

Study areas are small geographic areas, similar to neighborhoods, and the building blocks of a school district. Study areas are geographically defined following logical boundaries of the neighborhood such as freeways, streets, railroad tracks, or rivers. Each study area is then coded with the elementary, middle and high school that the area is assigned to attend. By gathering information about the district at the study area level, DDP and the District can closely monitor growth and demographic trends in particular regions and identify potential need for boundary adjustments or new facilities.

3) Schools

The District provided school facility location information to DDP for the purpose of mapping the District facilities. The school information includes school name, address, unique code and capacity.

4) Student Data

a. Historical Student Data - Historical enrollment is used to compare past student population growth and trends as well as the effects of mobility (move in, move out from existing housing) throughout the District. DDP utilized the three (3) previous year's (10-11, 11-12, 12-13) geocoded students as historical data.

b. Current Student Data - A student data file for October 3, 2013 (received by computer data file from the School District) summarized by grade level and by study area is used as a base for student population projections. Existing students were categorized by study area through the geocoding process that locates each student within a particular area based upon their given address. The projections run each of the next seven years from school year 2013-14 through school year 2020-21.

c. Student Accounting The Student Accounting Summary (Table 1) indicates the total student enrollment as of October 3, 2013 and the number of student used in the seven year student population projections. The projection model is based upon student residence and excludes students residing outside of the District's boundaries, students unable to be address matched and special education students (special education students usually attend a school that services their particular need).

Student Accounting Summary
School Year 2013-14 Actual Enrollment (10-03-2013)

Total Students Provided by District File (October, 2013)	12,644
Pre-Kindergarten	-80
<hr/>	
Covina-Valley U.S.D. TK-12 th grade Students	10,926
Students Living out of District	-1,209
Special Education Student	-339
Unmatched-Home Hospital-IS Students	-90
<hr/>	
K-12 and TK Students used for Projections by Resident	10,812

Table 1- Student Accounting Summary

Data Used for Variables

Two sets of data were compiled and reviewed for use in the seven year student population projections by residence:

1. Births by Zip Code
2. Mobility Factors

1) Births by Zip Code Data

Birth data by postal zip code was obtained from the California State Department of Health for the years 1995 - 2012 and roughly correlated to the Covina-Valley Unified School District. Past changes in historical birthrates are used to estimate future incoming kindergarten student population from existing housing.

2) Mobility Factors

Mobility refers to the increase-decrease in the migration of students within the District boundary (move-in-move-out of students from existing housing). Mobility, which is essentially a modified cohort, is applied as a percentage of increase-decrease among each grade for every year of the projections.

SEVEN YEAR PROJECTION METHODOLOGY

The projection methodology used in this study combines historical student population counts, past and present demographic characteristics, and planned residential development to forecast future student population at the study area level. District-wide projections are summarized from the individual study area projections. **These projections are based on where the students reside and where they should be attending school. We use the actual location of where the students reside, as opposed to their school of enrollment, in order to provide the most accurate estimate of where future school facilities should be located.** The best way to plan for future student population shifts is to know where the next group of students will be residing. The following details the methodology used in preparing the student population projections by residence.

Seven Year Projections

Projections are calculated out seven years from the date of projection for several reasons. The planning horizon for any type of facility is typically no less than five years, often longer. Seven years are usually sufficient to adequately plan for facility adjustments. It is a short to mid-term solution for planning needs. Projections beyond seven years are based on speculation due to the lack of reliable information on birthrates, new home construction and economic conditions.

Why Projections are Calculated by Residence?

Typically, school district projections are based on enrollment by school. However, this method is inadequate when used to locate future school facility needs, because the location of the students is not taken into consideration. A school's enrollment can fluctuate due to variables in the curriculum, program changes, school administration and open enrollment policies. These variables can skew the apparent need for new or additional facilities in an area.

The method used by DDP is unique because it modifies a standard cohort projection with demographic factors and actual student location. **DDP bases its projections on the belief that school facility planning is more accurate when facilities are located where the greatest number of students reside.**

The best way to plan for facility requirements is to know where the next group of students will be residing. The following details the methodology used in preparing the student population projections.

PROJECTION VARIABLES

Each year of the projections, 12th grade students graduate and continuing students progress through to the next grade level. This normal progression of students is modified by the following factors:

1) Incoming Kindergarten

Live birth data is reported by the California State Department of Health by the resident postal zip code of the mother. DDP uses the birth data by zip code roughly correlating to the District boundary and applies the data accordingly. If need be a different birth factor can be applied to various areas of the District.

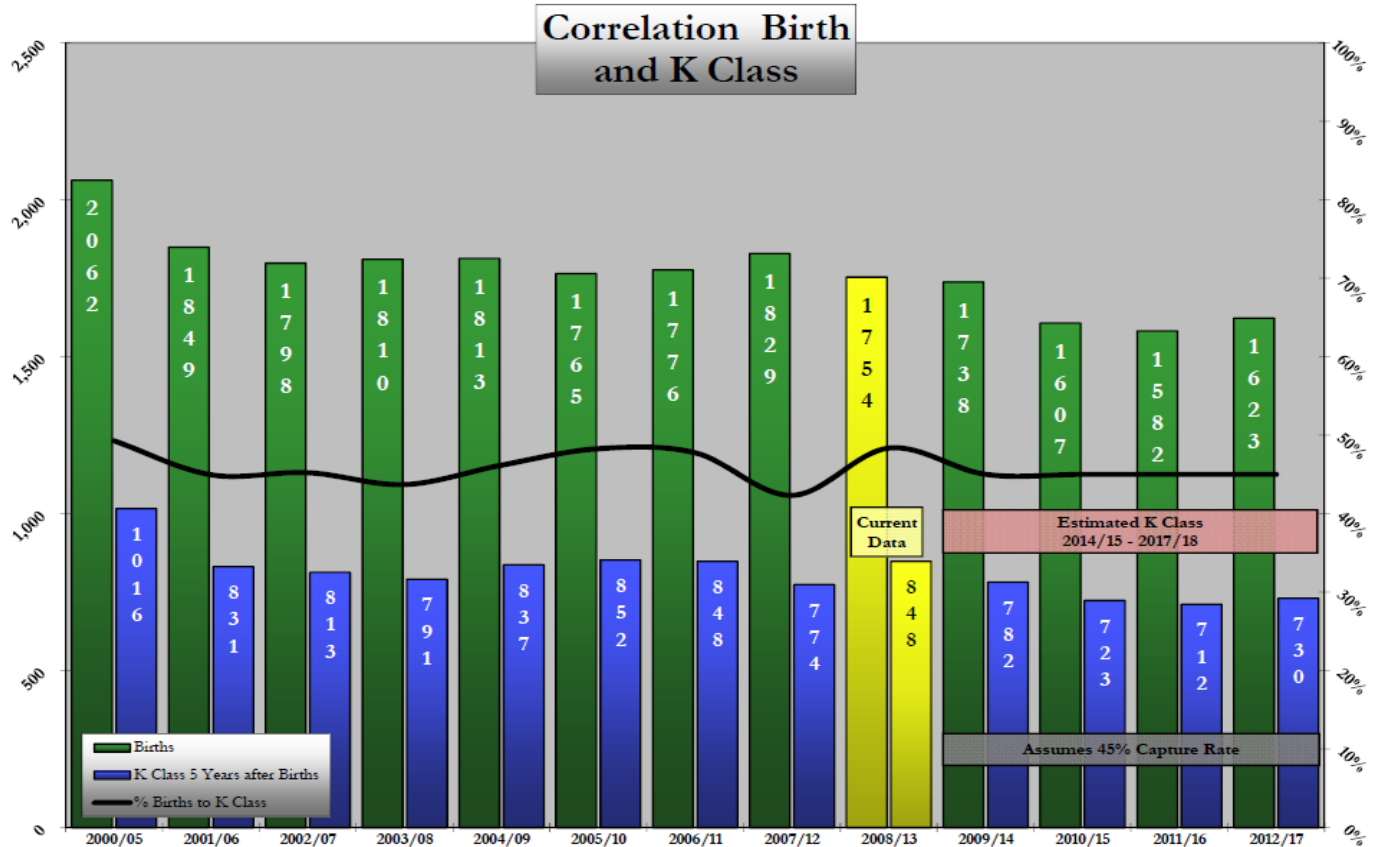

Incoming kindergarten classes, for existing homes, are estimated by comparing changes in past births in the area. Table 2 illustrates the total births for each zip code in the Covina-Valley Unified School District from 1995 to 2012. DDP assumes the current kindergarten class (2013-14) was born in five years ago (2008). Future incoming kindergarten classes are estimated by comparing the number births in 2008 to the number of births in 2009 - 2012. DDP compared the total births in 2008 to the total births in 2009, to determine a factor for next year's kindergarten class (2014-15). The 2008 births were compared to 2010 (2015-16's K class), 2008 to 2011 (2016-17's K class) and 2008 to 2012 (2017-18's K class).

The incoming kindergarten class for the final three (3) years of the student population projection (school years 2018-19 to 2020-21) has to estimated using a different methodology. In most cases DDP will determine the trend in births for each zip code and apply factors maintaining that trend.

2) Student Mobility Factors

Student mobility factors further refine the seven year student population projections. Mobility refers to the increase-decrease in the migration of students within the District boundary (move-in-move-out of students from existing housing). Mobility, similar to a cohort, is applied as a percentage of increase-decrease to each grade for every year of the projections.

A net increase or decrease of zero students over time is represented by a factor of **1.000**. A net student loss is represented by a factor less than **1.000** and a net gain by a factor greater than **1.000** (see Table 4).

Example:

$$\begin{aligned} & 100 \text{ Barranca kindergarten students in fall 13-14} \\ & \times 1.033 \text{ (Barranca 1st grade mobility)} \\ & = \mathbf{103.3} \text{ 1st grade students in fall 14-15} \end{aligned}$$

Having historical student data categorized by Study area is extremely helpful in calculating accurate Student Mobility Factors. DDP was able to utilize the last four year's (school years 2010-11, 2011-12, 2012-13, and 2013-14) student data. The 2010-11 student data was compared to 2011-12, 2011-12 to 2012-13, and 2012-13 to this year's student data at the Study area level.

Table 4 – Mobility Factors

APPLYING THE VARIABLES TO GENERATE THE PROJECTIONS

The following paragraphs summarize how DDP uses the factors to determine the student population projections. Remember that these projections are based on residence.

Covina-Valley Unified School District has been divided into 503 study areas. Every study area is coded with the school code of the elementary, middle and high schools attendance area it falls within. The residential projections are calculated at the study area level. This means that DDP conducts 503 individual projections that are based upon the number of students residing in each study area.

The first step in calculating the projections is to tally the number of students that live in each study area by each grade (Kindergarten through 12th grade). The current student base (school year 2013-14) is then passed onto the next year's grade (2013-14's K become 2014-15's 1st graders, 2013-14's 1st graders become 2014-15's 2nd graders, and so on). After the natural progression of students through the grades is applied, then Birth Factors are multiplied to the current kindergarten class to generate a base for the following year's kindergarten class.

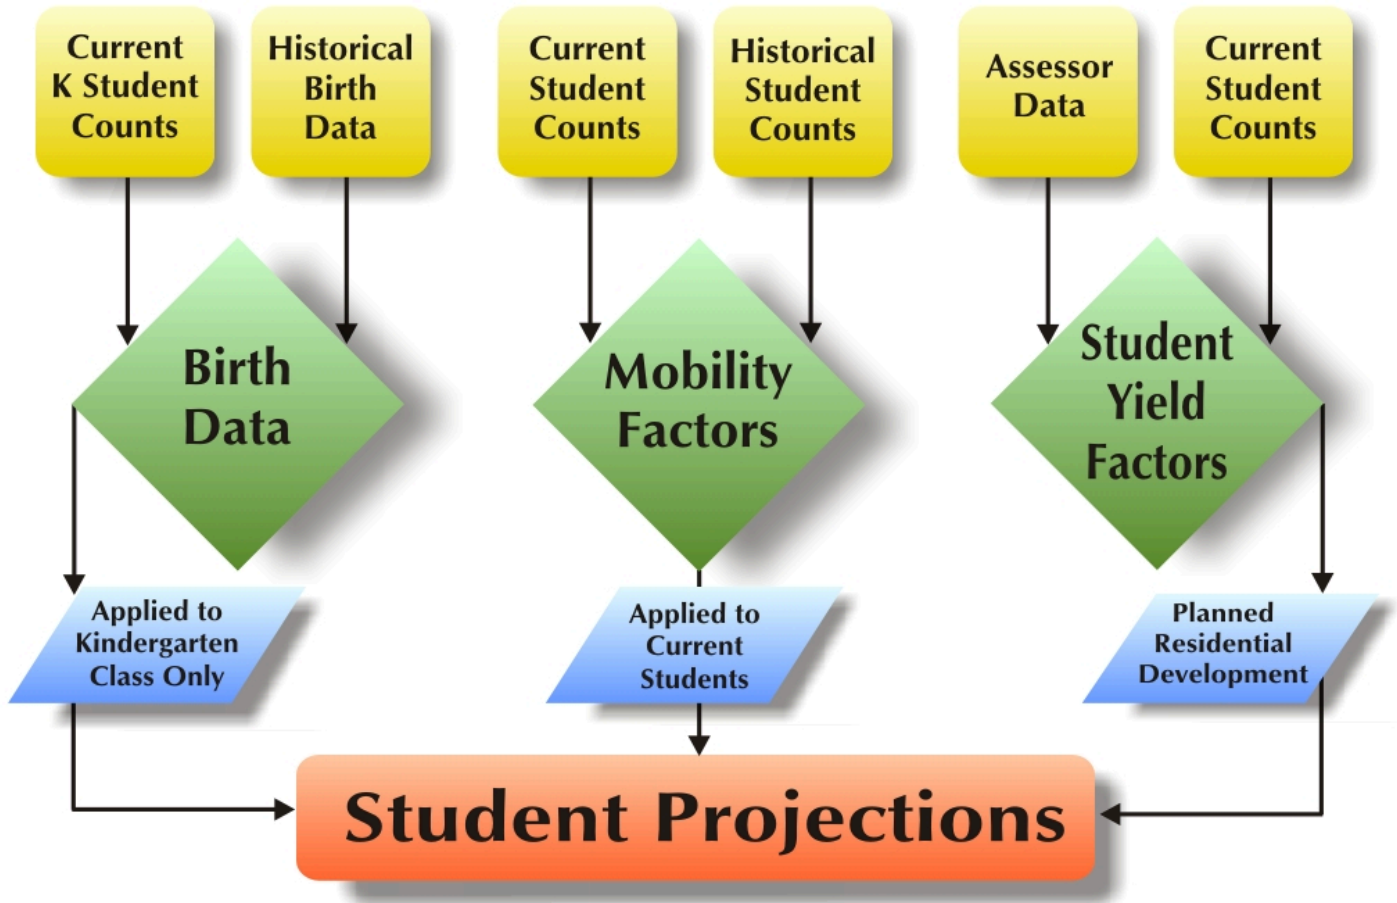

Next, a Mobility Factor is applied to all grades. Again, these factors take into account the natural in-out migration of students throughout the District. The mobility factor is applied to each student in every grade (K-12). A unique mobility factor is applied to each elementary school attendance area determined by the mobility factor study.

To finish generating the projections by residence, the same process is conducted for each of the 503 study areas. Once the projections have been run at the study area level, then it is simple addition to determine projections for each of the District's attendance areas or for a district-wide summary. For example, the residential projections for the Covina High School attendance area is simply the summary of all of the study areas that make up this specific attendance area (see section Four for the projections of each elementary, middle and high school attendance areas).

The District Summary for the projections (section Three) is a total summary of all 503 study areas. The projections exclude all of the students that attend a District school but live completely outside of the District's boundaries, students unable to be geocoded, special education students and independent study students. These students are factored back into the projections by calculating their current overall percentage of student population, applying the percentage to future years and adding it to the resident projections (please see the Attendance Matrices in section Two for a breakdown of the out-of-district, special education and unmatched students by school). DDP adds the current total out-of-district and unmatched students to each year of the projections because there is no way to accurately forecast these students in the future.

Current and historical students, geographic data and non-geographic data are used to calculate the factors used in the student population projections by residence. These factors are applied using SchoolSite and projections are calculated for each study area for each grade.

Projections by Residence Flowchart

SECTION TWO – ATTENDANCE MATRICES

Three Attendance Matrices have been included to provide a better understanding of where students reside and where they attend school. **Remember, DDP projections are based upon where the students reside, not the student's school of enrollment. This method allows DDP to provide the most accurate forecast of where shifts in student population may occur and changes to future facilities (if necessary) should be located.** Therefore, since the projections are based upon where the students reside, the figures we use as a base for each school's resident projection may be slightly higher or lower than the actual reported enrollment for each school. The best way to plan for future facilities is to know where the next group of students will be coming from, not necessarily which school they are currently attending

Attendance matrices act as a check and balance for student accounting. Illustrating where the students reside (in what School of Residence) based upon their geocoded address and which school they attend (School of Attendance) based upon District provided student data. It is essential to show how the students used in the projections match up to the District's records of enrollment for each school. Furthermore, intra-district transferring patterns can be determined by comparing School of Residence data to the School of Attendance data.

READING THE MATRIX

Starting with the K-5 Elementary School Attendance Matrix, let's begin with Barranca as an example. Following down the first column with the Barranca heading, there are 500 K-5 grade students attending Barranca and reside in the Barranca attendance area. Continuing downward, 29 students attend Barranca residing in the Ben Lomand attendance area. Next it shows that 12 student attends Barranca and resides in the Cypress attendance area, and so on.

The row Out of District refers to students living completely outside of the Covina-Valley Unified School District, but attending one of the District's schools. There are 41 Out of District students attending Barranca. Special Education refers to special education students attending Barranca, there are 5 Special Education students attending Barranca. Total Attendance is the total number of students attending a school regardless of where they reside, and reflects the District's enrollment counts for each school. There are 618 students attending Barranca.

The next step is to read across the matrix, beginning with the Barranca attendance area row. We know 500 represent the total number of K-5 grade students residing and attending Barranca. The next column, Ben Lomand, refers to the number of K-5 grade students residing in the Barranca attendance area, but attend Ben Lomand there are 4 students residing in the Barranca attendance area but attending Ben Lomand.

The Total Residence column is the total number of students living in that particular attendance area. There are 580 K-5 students residing in the Barranca attendance area. The Total Attendance row is the actual number of students used as the base or actual number for each attendance area in the 2013-14 projections.

SECTION THREE – DISTRICT WIDE STUDENT POPULATION PROJECTION

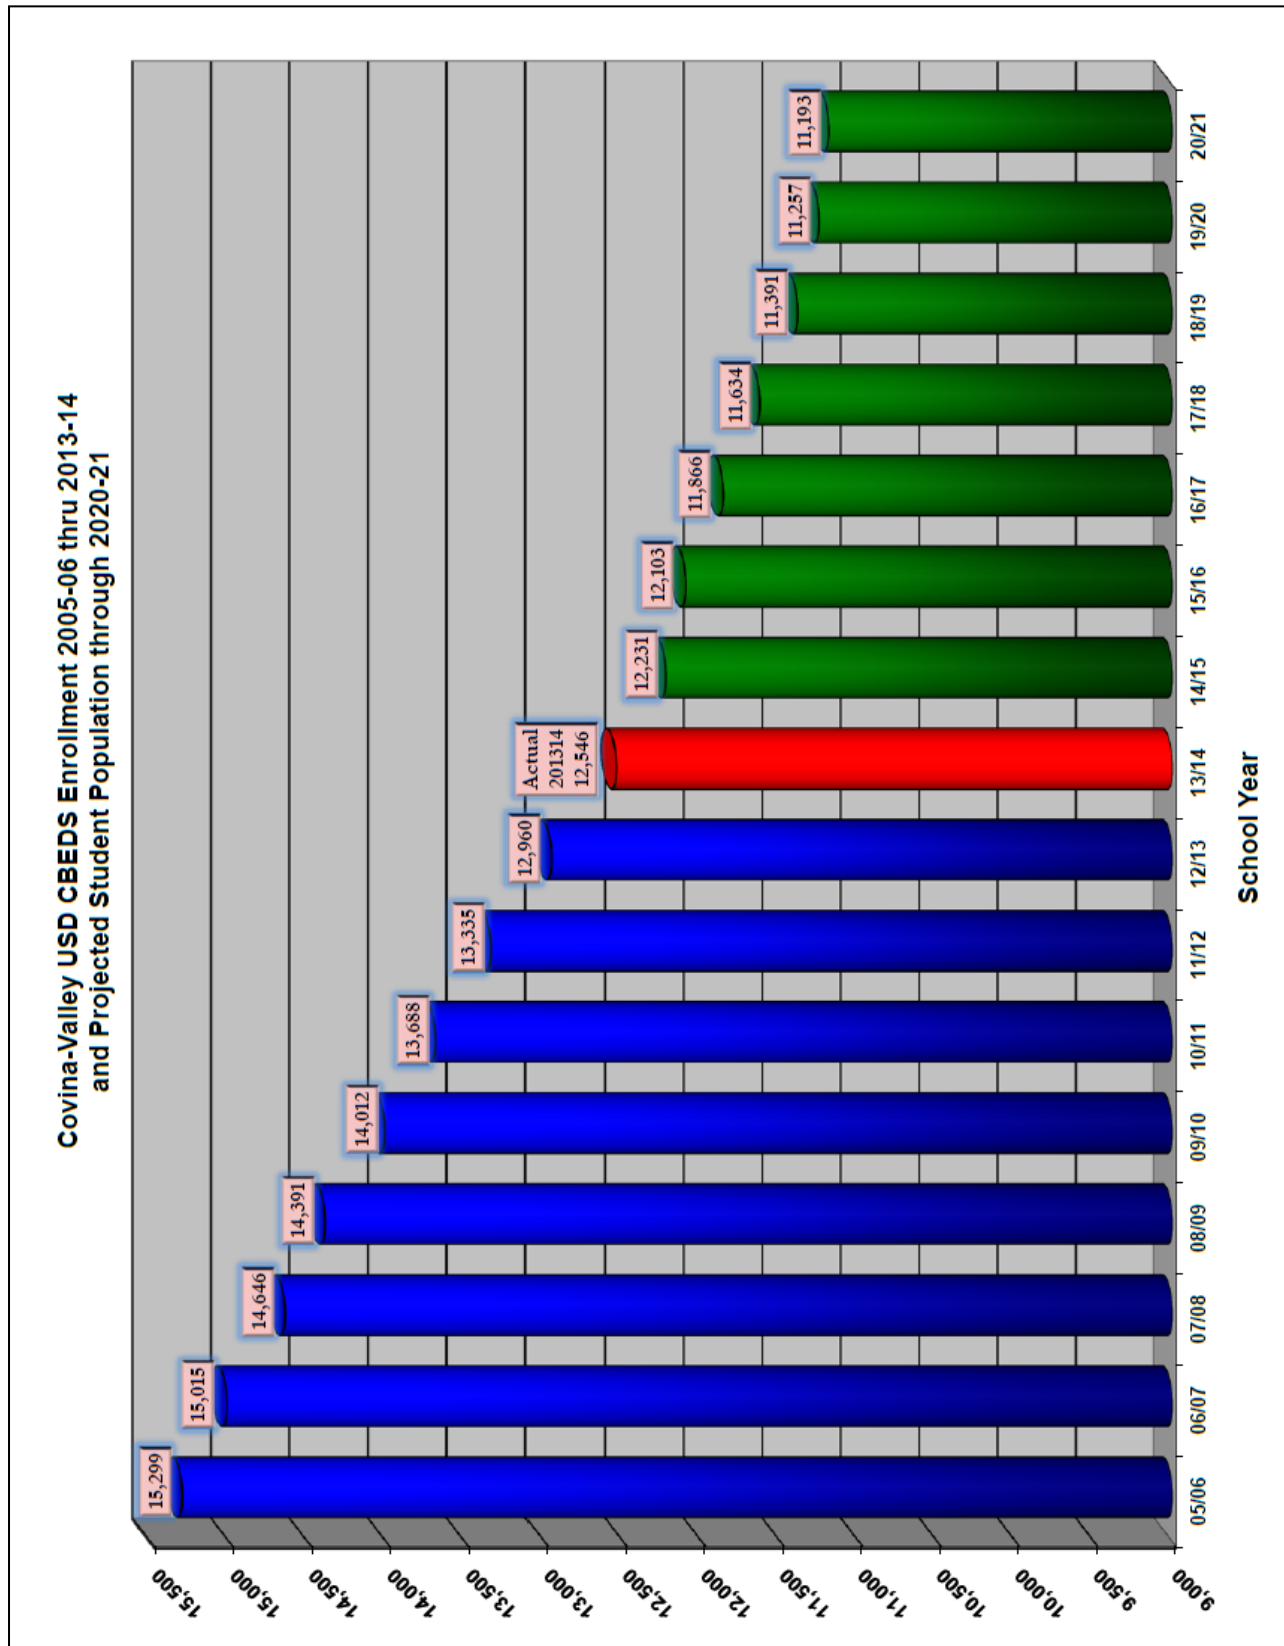

The student population is projected out seven years for each of the study areas, attendance areas and for the entire Covina-Valley Unified School District. The District Wide Summary enables the District to see a broad overview of future population shifts and what impact these shifts may have on existing and future facilities. Each attendance area is summarized to give a more local view of population changes and identify variances in the district. The study area listings enable the District to monitor student population growth or decline in neighborhood areas within the District.

Together, these projection summaries, present the means for identifying the timing of future population shifts and overall facility adjustments needed to accommodate these shifts. At any time, study areas and their projected resident students can be shifted between schools to assist in balancing enrollment, school consolidation among various other analyses.

DISTRICT-WIDE SUMMARY

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - East Whittier City Elementary School District**

- 1 Please confirm the school district serves residents within unincorporated County islands in the following cities: Whittier. Are there any additional areas of unincorporated Los Angeles County served by the district?

No.

- 2 Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools	220 Rooms @30 kids per room		6,366-6,600	6,113
Middle Schools	115 Rooms @ 36 kids per room		4,140	3,115
High Schools				0

- 3 Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

Yes, there is sufficient capacity. Total enrollment is 9,228. Total capacity is between 10,506-10,740 students depending on the number of kids per classroom. District has open enrolment policy where space is available.

- 4 Please indicate the District's student generation rates for residential land uses.

The district does not use student generation rates; use historic kindergarten enrolment by neighborhood.

Land Use	Elementary Schools	Middle Schools	High Schools
Single Family Residential	n/a	n/a	n/a
Multiple Family Residential	n/a	n/a	n/a

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - El Rancho Unified School District**

1. Please confirm the school district serves residents within the following unincorporated communities: Whittier Narrows. Are there any additional areas of unincorporated Los Angeles County served by the district?

none that we are aware of.

provided by: Leticia Co

2. Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools	6,744		6744	3492
Middle Schools	2,865		2865	2256
High Schools	6,699		6699	3186

provided by Carlos Jimenez

3. Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

Yes.

provided by: Leticia

4. Please indicate the District's student generation rates for residential land uses.

Land Use	Elementary Schools	Middle Schools	High Schools
Single Family Residential			
Multiple Family Residential			

The district does not have student generation rates. The District has attached its enrollment projections through 2015-16.
provided by:

County of Los Angeles General Plan Update Draft EIR
School Questionnaire - El Rancho Unified School District

5 Please summarize any additional resources (facilities, personnel) needed to serve future development under the General Plan Update.

none

N/A

provided by: Leticia Cavarro

6 Please describe any existing plans to expand school facilities that would serve the previously listed unincorporated communities. Please also describe the anticipated funding sources for such improvements.

Working on Facility Master Plan. Anticipate completion by September 2014.

At this time the District does not anticipate impact to unincorporated areas.

provided by: Leticia Cavarro

7 Are fees assessed against new developments for school related services? If so, in what amount for residential and non-residential (commercial and industrial) development?

The District collects Developer Fees for Residential & Commercial.

Residential Fees \$ 2.03 sq/ft

Commercial Fees \$ 1.42 sq/ft

The District has collected approximately \$ 114,000 last year.

provided by: Leticia Cavarro

COUNTY OF LOS ANGELES GENERAL PLAN UPDATE
Parks and Recreation Facilities Questionnaire

1. Other than the facilities listed in Table F1 (Parks and Recreation Inventory, dated 4-7-14) are there any other parks and/or recreational facilities within the County of Los Angeles that should be included in the Draft EIR?

The inventory we provided contains all of the County parks and recreational facilities under the jurisdiction of this department. This information should be included in the DEIR. However, please note that residents of the unincorporated areas may use other parks (city parks, private parks etc) that are not operated and maintained by DPR.

2. Please confirm that park needs are determined as follows:

“Per Municipal Code Section 21.24.340 (Residential Subdivisions, Local Park Space Obligation, Formula), in order to determine the local park space obligation for a subdivision, a formula is used which considers the number of dwelling units in the subdivision, the average household size by park planning area (which differs for single family, multi- family, and mobile home developments as well as by park planning area), and the adopted ratio of three acres of parkland per 1,000 residents, per the Quimby Act. However, it should be noted that, as discussed in the Parks and Recreation Element of the Proposed General Plan as a condition of zone change approval, General Plan amendment, specific plan approval, or development agreement, the County may require a subdivider to dedicate land according to the General Plan standards of four acres of local parkland per 1,000 residents, and six acres of regional parkland per 1,000 residents.”

The text referenced above pertains to the County’s Quimby parkland requirements. The formula referenced above is used to determine the park obligation of a residential subdivision.

Typically, recreational facility and program needs are identified by DPR’s Field Agencies based on input from the community and the Board offices. With grant funding from the State, DPR recently prepared comprehensive needs assessments for six unincorporated communities: East Los Angeles, East Rancho Dominguez, Lennox, Walnut Park, West Athens-Westmont, and Willowbrook. To determine the park needs of these communities, DPR analyzed a variety of factors, including but not limited to: population size and growth; age of residents; race/ethnicity; income; quantity and quality of existing park facilities; existing park deficiencies in terms of acreage; and service radii of existing parks. In addition, DPR used surveys, focus groups, stakeholder interviews, bike/walking tours, community workshops, and other outreach methods to collect input from residents regarding their park needs, preferences, and desires.

3. Are existing resources adequate or deficient in terms of meeting the County’s recreational needs?

Existing resources are deficient in meeting the County’s recreational needs. As shown in Table 10.4 of the Parks and Recreation Element, most of the County’s planning areas have deficits in local and/or regional parkland. Additional parkland and recreational

COUNTY OF LOS ANGELES GENERAL PLAN UPDATE
Parks and Recreation Facilities Questionnaire

services would need to be provided to address these deficits and satisfy the unmet needs.

4. Are there any planned additions or alterations to existing park and/or recreational facilities? If so, please indicate.

Yes, there are planned additions or alterations to existing park and recreational facilities due to the need: to upgrade, improve, expand or replace aging and/or deteriorating facilities; and to accommodate the growing and diversifying needs and preferences of park users.

As part of the Community Parks and Recreation Plans project, DPR is also in the process of identifying potential sites for new parks and/or trails in the six communities previously mentioned. DPR would need to secure additional funding to implement the potential new park/trail projects.

5. What are the current sources of revenue for existing and or future park/recreation facilities? Is new development assessed park fees and, if so, in what amount?

Please refer to the Park Dedication and Funding section of the Parks and Recreation Element (pages 170 and 171).

6. To the best of your knowledge, has park and recreational facilities usage changed in past years? For example, has the level of need increased, decreased or stayed the same? Please provide any available figures to document this change.

Park and recreational facilities usage has increased in past years. We have found that the need has increased and diversified due to a variety of factors, including but not limited to demographic changes and the growing popularity of various sports or activities such as futsal and skateboarding.

7. The attached project description provides a statistical analysis showing the existing land use and projected buildout under the Proposed General Plan (Table 1-2). What additional measures, if any, do you recommend to ensure that adequate service would be available to the County under the Proposed General Plan? If there are particular concerns, what do you recommend to alleviate those concerns? (Please attach additional pages as needed).

To ensure adequate park and recreation services, we recommend implementation of the policies in the Parks and Recreation Element, as well as the programs described in the Implementation Programs section.

School Questionnaire - Saugus Union School District**

- 1 Please confirm the school district serves residents within the following unincorporated communities: Agua Dulce, Castaic, Lake Hughes, Stevenson Ranch, Val Verde. Are there any additional areas of unincorporated Los Angeles County served by the district?

Please see attached map. Yellow represents the areas of unincorporated Los Angeles County.

- 2 Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools	7,888	3,172	11,600	10,036
Middle Schools				0
High Schools				0

- 3 Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

Yes.

- 4 Please indicate the District's student generation rates for residential land uses.

**County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Sulphur Springs Union School District**

- 1 Please confirm the school district serves residents within the following unincorporated communities: Agua Dulce, Canyon Country, Newhall. Are there any additional areas of unincorporated Los Angeles County served by the district?

Canyon Country
Newhall

- 2 Please provide any information available on total District-wide capacities and confirm current enrollments at the elementary, middle school, and high school levels.

School Level	Capacity Permanent Buildings	Capacity Portable Buildings	Total Capacity	Current Enrollment
Elementary Schools	3419	1650	5069	3945 5521
Middle Schools	NA	NA	NA	854 0
High Schools	NA	NA	NA	0

- 3 Are the existing school facilities (classroom, athletic, recreational, or other facilities) adequate to serve the District under current conditions?

The current school facilities meet current enrollment needs. Mitigation agreements are in place for known planned developments.

- 4 Please indicate the District's student generation rates for residential land uses.

Land Use	Elementary Schools	Middle Schools	High Schools
Single Family Residential	0.308	0	0
Multiple Family Residential	0.215	0	0

Students matriculate to Wm. Hart High School District for grades 7-12

County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Sulphur Springs Union School District

- 5 Please summarize any additional resources (facilities, personnel) needed to serve future development under the General Plan Update.
2 schools will be built in the future to accommodate enrollment growth from known developments. Additional staff will be hired to serve these schools as well as enrollment increases from several other developments with anticipated start dates of 2014-2018 that will impact schools.
- 6 Please describe any existing plans to expand school facilities that would serve the previously listed unincorporated communities. Please also describe the anticipated funding sources for such improvements.
Modernization of 2 schools is planned to serve students in Canyon Country and Newhall. The district has an open enrollment policy, so growth trends will be tracked for inter and intradistrict transfers and within district/school enrollments. The District has applied for state modernization/New school funds. Measure 42 (GO Bond)
- 7 Are fees assessed against new developments for school related services? If so, in what amount for residential and non-residential (commercial and industrial) development?
funds will be used.

Multiple Family Residential	1.	1.	NA

County of Los Angeles General Plan Update Draft EIR
School Questionnaire - Valle Lindo Elementary School District

5 Please summarize any additional resources (facilities, personnel) needed to serve future development under the General Plan Update.
Long range plans are to replace all portable buildings with permanent buildings.

6 Please describe any existing plans to expand school facilities that would serve the previously listed unincorporated communities. Please also describe the anticipated funding sources for such improvements.

No plans to expand school facilities as Whittier Narrows is under the Army Corps of Engineers and is considered a flood zone.

7 Are fees assessed against new developments for school related services? If so, in what amount for residential and non-residential (commercial and industrial) development?

Residential = \$2.47

Non residential = \$0.47
