Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

CAUTION: External Email. Proceed Responsibly.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Department Regional Planning,

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.

Dear Supervisors and Department of Regional Planning Staff,

I live near the Inglewood Oil Field, and I am personally affected by harmful oil and gas drilling, which is why I support a quick and just end to all drilling throughout LA County within five years.

Thank you for supporting the motions in September 2021 to begin the work of phasing out dangerous oil drilling in our neighborhoods.

I am very concerned about the health impacts of current drilling on my community, and urge you to move forward with phasing out existing drilling as quickly as possible county-wide and in the Inglewood Oil Field. We don't deserve to breathe dangerous air, and we're counting on you to take decisive action to protect us.

Please move forward with making oil and gas drilling a nonconforming use; expediting the phase-out period county-wide, including in the Inglewood Oil Field; and implementing a just transition to help workers.
