Valley Area Plan Framework

AREA PLANS
The General Plan identifies a total of 11 geographically delineated Planning Areas, one of which is the East San Gabriel Valley Planning Area. As an extension of the General Plan, the Area Plan will focus on land use and policy issues specific to the Planning Area, providing a mechanism to draft policies and programs that respond to the unique and diverse character of local communities.

Through the Area plan, additional implementation strategies will be identified based on need, such as community plans, specific plans, and community-specific zoning regulations. In the development of these plans, attention will be directed to opportunity areas, such as transit centers, major corridors, and preservation or transition of industrial districts.
