SAN FERNANDO VALLEY AREA PLAN

What is an Area Plan?

An Area Plan is a document that will **guide future development and preservation** of a geographical area. The plan will include **goals and policies** rather than specific project proposals.

The plan will include a Historic Context Statement, a document that identifies the important themes relevant to the history and development of the built environment of a geographic area.

The map below highlights the communities we will be working with:

1. Oat Mountain
2. Twin Lakes
3. Sylmar Island
4. Kagel & Lopez Canyons
5. Universal City
6. Westhills
7. West Chatsworth

Why am I receiving this notice?

LA County Planning is working on an Area Plan for the San Fernando Valley. You received this notice because you are the registered property owner of land within the unincorporated area of the San Fernando Valley (see map).

Why should I participate?

This project provides an opportunity to **identify the needs of the community** through policies that will direct future development.
