

## COMMUNITY STANDARDS DISTRICT – COMPLAINT LOG THIRD QUARTER 2023

**Q3-23-05:** On 07/02/2023 @ 12:19 AM, The R/P called SPR's 24-hr 1-800 number to report a strong sulfur-like smell. The R/P's location was noted as Ladera Heights area, 5200 block of Sherbourne Drive, south of the IOF. Below is a detailed summary of the complaint and investigation. Based on site assessment and wind direction, it was determined the strong sulfurous odor was likely due to local, uncontrolled fireworks coming from outside of the field, which was noted by the field operator.

**Q3-23-06:** On 07/30/2023 @ 9:54 PM, The R/P called SPRs 24-hr 1800 number to report a noise complaint of dogs barking out in the fields late at night. SPR called the R/P back twice and left two voicemails. Operations staff looked around for a stray/wild dog, but none were found.

COMMUNITY STANDARDS DISTRICT – COMPLAINT LOG  
THIRD QUARTER 2023

Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<a href="#"><u>Q3-23-05</u></a>	7/2/23 @ 12:19 AM	[REDACTED]	[REDACTED]	5200 block of Sherbourne Drive	Odor	Delatorre Email - 7/3/23 8:51 AM
Comments/ Sentinel Peak Resources actions:	<ul style="list-style-type: none"><li>• <b>Complaint:</b> On 7/2/23 @ 12:19 AM, The R/P called SPR's 24-hr 1-800 number concerning a "Terrible odor, like sulfur". The R/P's location was the Ladera Heights area, Los Angeles.</li><li>• <b>SPR Response:</b> On 7/2/23, 12:30 AM, The R/P was contacted by EHS On-Call. The R/P stated, "this is the 5th time I have smelled this strong sulfur smell in the last 10 years I have lived here". SPR On-Call indicated that he would check immediately with SPR field operations staff to see if any sulfur or unusual smell was coming from SPR operations and would contact the resident later the next morning.</li><li>• <b>SPR Operator Assessment:</b> At 12:40 AM, SPR Field Operations was contacted by EHS On-Call and provided the complaint and location. At 2:15 AM, The lead field operator assessed the southwest portion of the IOF and could not detect odors or a sulfurous odor from field operations. The operator noted some sulfurous odors coming from local fireworks outside of the field. A produced fluids leak (~15 gallons) had been identified, which was quickly contained and shut-in at the Packard Tank Setting at approximately 1:30 AM; however, this exhibited a low-level petroleum odor. This contained fluids resulted after the odor complaint.</li><li>• <b>SCAQMD Assessment:</b> N/A. No indication that SCAQMD was contacted.</li><li>• <b>On-site MET Station:</b> Hourly wind direction and wind speed are provided from 9 PM on 7/1/2023 to 2 AM on 7/2/2023 via the SPR MET Station. Average wind direction and speed throughout this timeframe was from the north northwest (NNW, 345.8°) and blowing to the ENE at 2.2 mph. At the time of the odor complaint, the wind direction was estimated to be from the east-northeast (ENE, ~69.5°) and blowing to the west-southwest (WSW) at ~0.7 mph.</li><li>• <b>Conclusion:</b> Based on the site assessments, including the wind direction, it was determined that the odors were likely attributed to local, uncontrolled fireworks in the area.</li></ul>					
Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<a href="#"><u>Q3-23-06</u></a>	7/30/23 @ 9:54 PM	[REDACTED]	[REDACTED]	Labrea and North Ridge	Noise	Delatorre Email - 7/31/23 8:28 AM
Comments/ Sentinel Peak Resources actions:	<ul style="list-style-type: none"><li>• <b>Complaint:</b> . On 07/30/23 @ 9:54 PM, The R/P called SPR's 24-hr 1800 number to report a noise complaint. The caller reported "I keep hearing dogs barking out in the fields late at night. Please call me back". The R/P's location was Labrea and North Ridge.</li><li>• <b>SPR Response:</b> EHS On-call contacted the complainant shortly after the complaint was filed and was only able to leave a message with SPR call back information. The complainant was called again the next morning at 8:16 AM and a second message was left. In the second message SPR informed the caller that we do have coyotes in the oil field and that we're not able to take any steps to address. On occasion, we do have stray or wild dogs that sometimes make their way into the oil field, and we attempt to coral those and seek assistance from animal control; however, that assistance is limited. Our operations staff is in process to see if we can identify a wild dog or similar in this area of the field, i.e., the southeast quadrant.</li><li>• <b>SPR Operator Assessment:</b> SPR operations staff conducted an investigation in southeast quadrant of the field, but were unable to locate any stray or wild dog, or any other such animal.</li><li>• <b>Conclusion:</b> No stray or wild dogs, coyotes, or any such animals were found during operation staff's search.</li></ul>
