

COMMUNITY STANDARDS DISTRICT – COMPLAINT LOG
SECOND QUARTER 2019

~ COMPLAINT SUMMARY ~

Q2-19-08 - R/P contacted the LADRP on 04/01/19 @ 11:16 hrs. and advised of cracks to the front porch of his residence in the [REDACTED] W. 64 th St., Inglewood. SPR responded with structural experts.
Q2-19-09 - R/P called SPR 800# on 04/30/19 @ 20:58 hrs. to complain about an odor of "oil & fumes" near his home in the [REDACTED] Chariton Av., Ladera Hts. SPR called the R/P back, 13 mins later and were advised that the odor had dissipated. At the time of the complaint the wind was blowing in the opposite direction and it is unlikely that the odor was emanating from the IOF.
Q2-19-10 - R/P called SPR 800# on 04/30/19 @ 21:24 hrs. to complain about an odor of "gas from the oil fields" near his home in the [REDACTED] o Chariton Av., Ladera Hts. SPR called the R/P back 6 mins later and the R/P advised that the odor had started about a hour before he called, but was now dissipating. At the time of the complaint the wind was blowing in the opposite direction and it is unlikely that the odor was emanating from the IOF.
Q2-19-11 - AQMD Insp. Lee arrived at the IOF on 05/09/19 @ 22:53 hrs. and called the SPR 800#. He advised he had rec'd an odor complaint from a resident in the Village Green neighborhood. Mr. Lee could not be more specific about the nature of the complaint/type of odor, and based on AQMD policy, could not provide any contact details. Mr. Lee toured the IOF (leaving @ approx. 23:45 hrs.) and detected no odors or unusual activities.
Q2-19-12 - R/P called the SPR 800# on 05/10/19 @ 23:23 hrs. to complain about a "pungent type odor" that he could smell at his residence in the [REDACTED] of Aladdin St., L.A. AQMD Insp. Lee also called the SPR 800# in regards to the R/P's complaint (20 mins later) and responded to the IOF to again tour the site to investigate. Mr. Lee conducted a tour, but no odors were detected.
Q2-19-13 - R/P called the SPR 800# on 05/11/19 @ 18:13 hrs. to report what appeared to be "smoke" possibly coming from one of our pumping units on the south side of Stocker St. near La Cienega Blvd. SPR Operators responded to the location, but not smoke was found. A pumping unit in the area was found to have belt failure, but it was inconclusive as to whether this was the cause of the "smoke." The R/P advised that no further contact or follow up was needed.
Q2-19-14 - R/P called the SPR 800# on 06/19/19 @ 07:42 to report a "foul smell" outside of her home (back & front yards), in the [REDACTED] Cranks Rd., Culver City. The R/P stated that she has smelled the odor several times (in the AM hrs.) for the past 2 wks. SPR personnel assessed the location in the morning during the hours in question for the remainder of the week, but no odors were ever detected. Wind direction for that date/time period shows the wind blow towards the IOF (west to east) from the R/P's residence.
Q2-19-15 - R/P emailed MRS Environmental's Mr. Dusette in regards to several loud "booming explosion" noises over the past several weeks coming from the direction of the IOF. SPR checked with the field Operators, and at no time were there ever any activities or incidents that did cause or could cause the type of noise in question. SPR determined that it is possibly the close proximity to Independence Day (early fireworks), SCE night construction activities (near the northern portion of the college), and/or various graduation ceremonies/celebrations.
Q2-19-16 - AQMD Inspectors responded to the IOF on 06/20/19 @ 22:50 hours to investigate several (possibly 6) odor complaints from unknown residents/locations. The Inspectors asked to and were escorted to the S/E portion (Stocker lease) area of the field, but did not detect any odors and left shortly thereafter, with no further action taken.

COMMUNITY STANDARDS DISTRICT – COMPLAINT LOG
SECOND QUARTER 2019

<u>Q2-19-09</u>	04/30/19 @ 20:58	██████████	██████████	██████ Chariton Ave., Ladera Hts.	Odor	tstapleton Email - 05/01/19 @ 08:48
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none">The R/P called the SPR 800# on 04/30/19 @ 20:58 hours to complain about an odor of "oil and fumes" near his residence in the ████████ Chariton Ave, Ladera Hts.SPR EH&S Specialist P. Vowell called the R/P back in regards to the odor 04/30/19 @ 21:11 hours. At that time the R/P walked outside and advised that the odor had disappeared.In regards to this complaint, Mr. Vowell advised that SPR Operator M. Hill had called the 800# earlier in the evening (@ 19:22 hrs.) and reported a small release of oil & water (less than 10 gals of each fluid) from SPR LA11-175. At that time, the well had been shut-in, the release had been contained and a vac truck was at the location retrieving the released material. Mr. Vowell called Operator Hill back and asked him to check the area again and, if he found any other issues to call him back, but to otherwise report back to SPR's L.A. Basin's EH&S personnel in the morning. No further issues were found by Operator Hill.A check of the on-site Met Station revealed the wind was blowing in the opposite direction

SECOND QUARTER 2019**

Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-11</u>	05/09/19 @ 22:53	Lee, Thomas (AQMD)	██████████	Village Green neighborhood	Odor	tstapleton Email - 05/10/19 @ 08:33
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> On 05/09/19 @ 22:53 hours AQMD Inspector Thomas Lee arrived at the IOF & called the SPR 800#. On call SPR EH&S Specialist Walters promptly returned Inspector Lee's call, at which time Inspector Lee advised that he had received an odor complaint from a resident in the Village Green neighborhood and he wanted to tour the field. Mr. Walters called the on Operators and arranged for one of them to meet the Inspector at Gate #1 (@ Stocker & Fairfax). The Operator, per the Inspector's request, drove through and around the oil field, however the Inspector did not detect/notice any odors or problems and left the site at approx. 23:45 hours. Mr. Walters tried to obtain additional information from Inspector Lee as to the type of odor, specific time the odor was detected and/or the complainants contact information, but the Inspector could not provide any further details. A check of the onsite Meteorological Station wind speed/direction data for 05/09/19 20:00 through 05/10/19 0:00 hours revealed the wind direction was from the SW and blowing to the NE at an average hourly rate of ~4 mph. 					
Reference #	Date & Time	Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-12</u>	5/10/2019 @ 23:23	██████████	██████████	██████████ Aladdin St., L.A.	Odor	tstapleton Email - 05/13/19 @ 07:30
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> ██████████ called SPR's 800# On 05/10/19 @ 23:23 hours to complain about a "pungent-type odor" that he could smell near his residence in the ██████████ Aladdin St., L.A.. Due to the late hour, the complainant requested a call-back the next day or later in the week. AQMD Inspector Lee called the SPR 800# in regards to ██████████ complaint 20 minutes after (@ 23:53) ██████████ call. SPR On-call EH&S Specialist Walters promptly called Mr. Lee back, who advised he would be responded to the IOF to investigate the complaint. Mr. Walters contacted SPR on-duty personnel and when Inspector Lee arrived approx. 20 mins later, he was met by SPR personnel. A SPR Operator drove the Inspector through the northern areas of the IOF, including the Stocker lease, Dabney-Lloyd and other areas but no odors relating to the oil field were detected. Data from SPR on-site Met Station: Wind Direction & Speed (05/10/19 22:00-05/11/19 01:00): Wind direction was westerly from the west and blowing to the east at an average hourly rate of ~4 mph. 					
Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-13</u>	5/11/2019 @ 18:13	██████████	██████████	w/b Stocker St. towards La Cienega	Other	tstapleton Email - 05/13/19 @ 07:53
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> On 05/11/19 @ 18:13 hours while driving w/b on Stocker St. near the Inglewood field, ██████████ called the SPR 800# to report that he could see smoke coming, from, what appeared to be one of our pumping units on the south side of Stocker St., nearing La Cienega. ██████████ advised that there was no need for SPR to return his call or contact him further, he just called SPR to advise us of a potential situation. On-call SPR EH&S contacted the IOF on-call operators and informed them of the call & approximate area where ██████████ had possibly seen smoke coming from. Operations immediately investigated and indicated that all wells were checked around the 13 setting and adjacent to the Edison substation including the areas around LA11-436. No smoke or anything similar were identified near these areas. At 19:20 hours, SPR Operations called EH&S back and indicated that on pumping unit BC-311, (north of the guard shack @ Stocker/Fairfax), it was discovered that 2 belts had failed and, though there was no smoke present, this may have caused the reported smoke.

SECOND QUARTER 2019**

Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-14</u>	06/19/19 @ 07:42	██████████	N/A	██████ Cranks Rd, Culver City	Odor	tstapleton Email - 06/19/19 @ 07:56
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> On 06/19/19 @ 07:42 the R/P emailed SPR EH&S Mgr. D. Taimuty. The R/P stated that there was a "foul smell" outside her home, that is present in both the front & backyards and that she has "smelled it" several time in the last 2 weeks, mostly in the mornings, and then it dissipates. SPR's Mr. Taimuty responded to the location on 06/19/19 @ approx. 08:10. Mr. Taimuty advised that the wind was blowing from the s/w, which would be <i>from</i> the R/P's residence <i>to</i> the oil field. No odors were detected, but it was determined that the smell was not coming from the IOF. However, Mr. Taimuty advised he would respond to the location in the morning hours (at the approx. time the R/P stated she detects the odor) for the remainder of the week. SPR's onsite Met Station data shows onshore winds (west to east) during the morning hours. 					
Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-15</u>	06/19/19 @ 11:15	██████████	N/A	████ Jefferson & Duquesne, Culver City	Noise	tstapleton Phone - 06/20/19 @ 13:34
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> The R/P, a resident of Culver City (in the a/o Jefferson & Duquesne) emailed Mr. Dusette of MRS Environmental on 06/19/19 @ 11:15 hours in regards to several loud "booming explosion" noises over the past several weeks in the middle of the night, coming from "the direction of the oil field." Mr. Dusette forwarded this information to SPR Environmental Specialist J. Walters on 06/19/19 @ 11:48 hours. SPR assessed the noise complaint and determined that there were no activities that would have caused the noises in question and determined that the noises are possibly coming from fireworks activities due to the upcoming Independence day holiday, SCE night construction activities in the northern portion of the college and/or graduation activities from various schools in the area. 					
Reference #	Date & Time	Reporting Party (R/P) Name (Last, First)	Phone #	Location	Complaint	CSD Reporting (EMAIL - Date/Time)
<u>Q2-19-16</u>	06/20/19 @ 22:50	Homsey, Peter AQMD Inspector	██████████	Inglewood Oil Field, possibly s/e side of field	Odor	tstapleton Email - 06/20/19 @ 08:26
<i>Comments/ Sentinel Peak Resources actions:</i>	<ul style="list-style-type: none"> On 06/20/19 @ 22:50 hours, AQMD Inspector Homsey telephoned EH&S Specialist J. Walters advising that they (himself & Inspector Lee) were investigating and assessing various odor complaints (approx. 6 complaints, based on info given to IOF Operators by the Inspectors) coming from the southeast side of the IOF. Inspectors Homsey & Lee arrived at the IOF on 06/20/19 @ 22:50 and met with SPR Lead Operator who escorted them to our Stocker leas location (s/e side of the field), however neither of the Inspectors detected any odors and they left the field shortly thereafter. A check of the IOF on-site Met Station from 06/14/19-06/21/19 20:00 through 00:00 hours, revealed that the wind direction was generally an onshore flow, west to east.
