

THE PASSIVIST

concept design by Graham Irwin

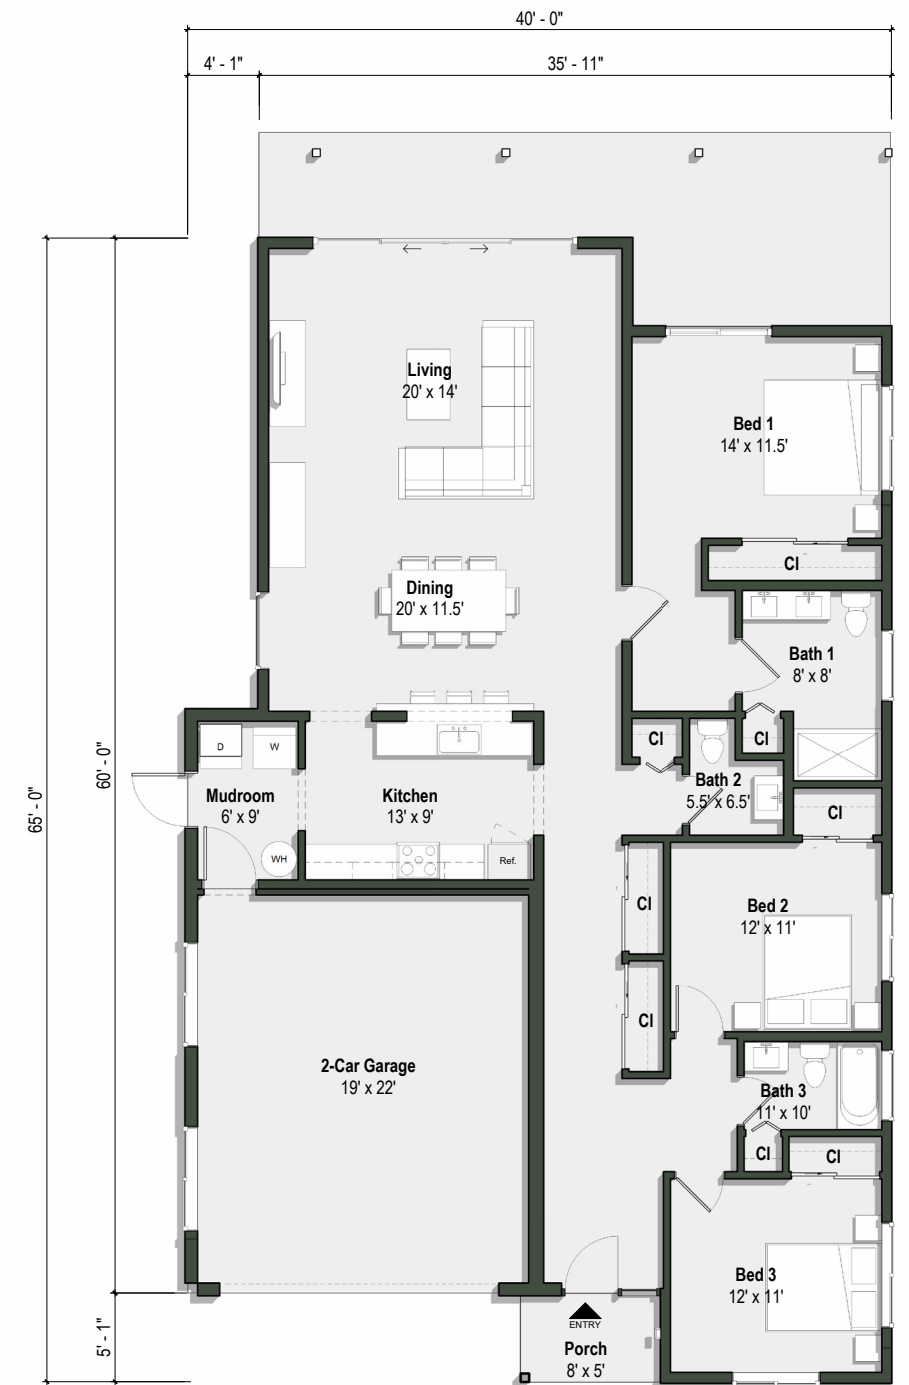

THE FOOTHILL CATALOG
FOUNDATION

The Passivist combines Modern style with cutting-edge design. The living and dining area, filled with natural light provided by clerestory windows on all four sides, open onto the backyard through large sliding doors. The plan is available in four tower orientations, allowing homeowners to maximize on-site solar electricity generation with rooftop panels. The Passivist is available with standard construction detailing or it can also be designed to the Passivhaus standard for those looking to push the envelope of resilient design.

Features of the Design

- 40'-0"W x 65'-0"L
- 1,827 SF
- 3 Bedrooms
- 2.5 Bathrooms
- Attached Garage
